

ALPSCON[®]

WHERE DREAMS AND GROWTH ARE LIMITLESS!

**Step-by-step guide
for all explorers and
MetaMask newbies:
How to become part
of the community**

These instructions provide you with a clear overview of how you can integrate into our decentralized network and benefit from its advantages - transparent, independent, and free from traditional financial services.

TABLE OF CONTENTS

- 1. Download the MetaMask wallet**
- 2. First steps – creating a new wallet**
- 3. Registering and verifying with MetaMask**
- 4. Importance of the recovery phrase**
- 5. Editing account name in MetaMask**

- 12. KYC/KYB verification**
- 13. Swap TRAI tokens**
- 14. Activate trading AI**
- 15. Adjust fees**
- 16. Confirm the smart contract**
- 17. Activate Auto Compound**

1. Download the MetaMask wallet

Preparation: Set up a wallet

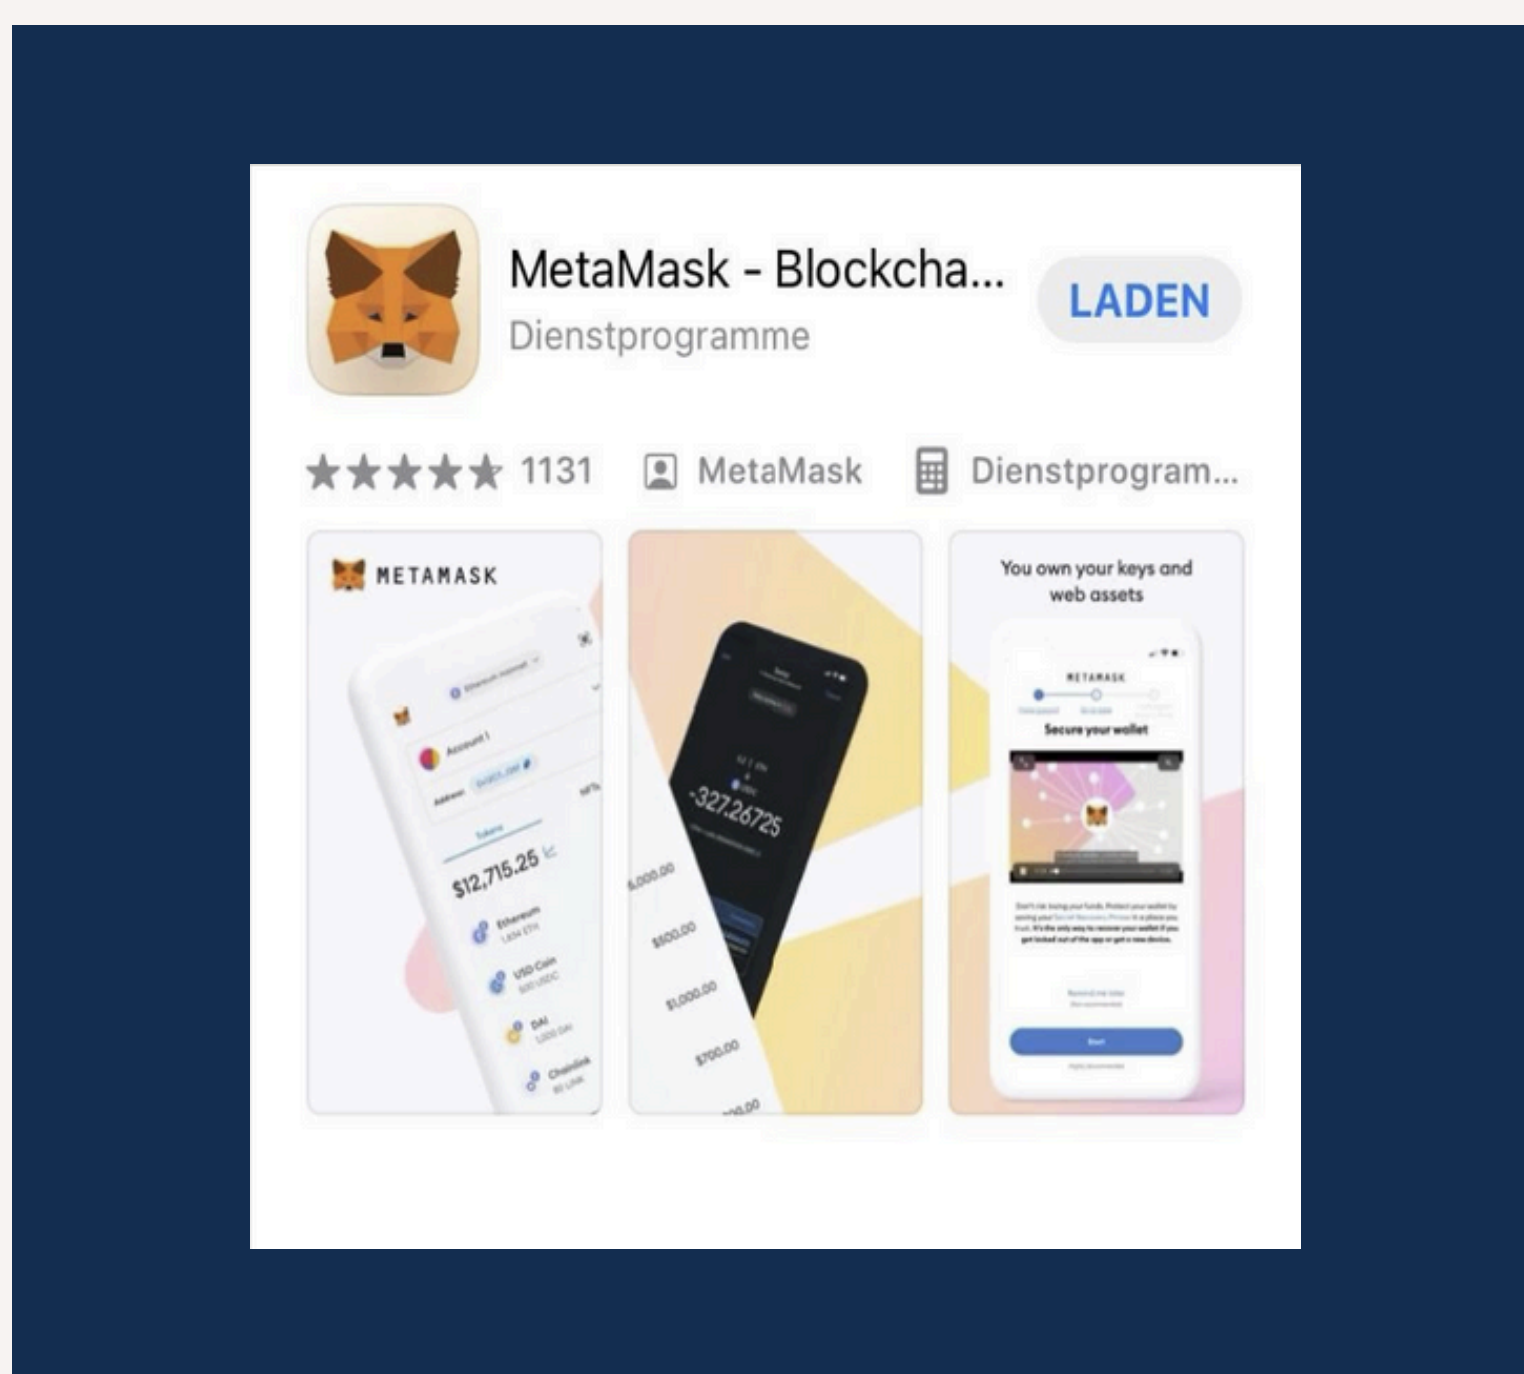

Before you begin, please install a wallet (e.g., MetaMask) on your device:

1. Open the **App Store** (iPhone) or **Play Store** (Android).
2. Search for **MetaMask** and click Install.
3. Follow the setup instructions in the app to create your personal account.

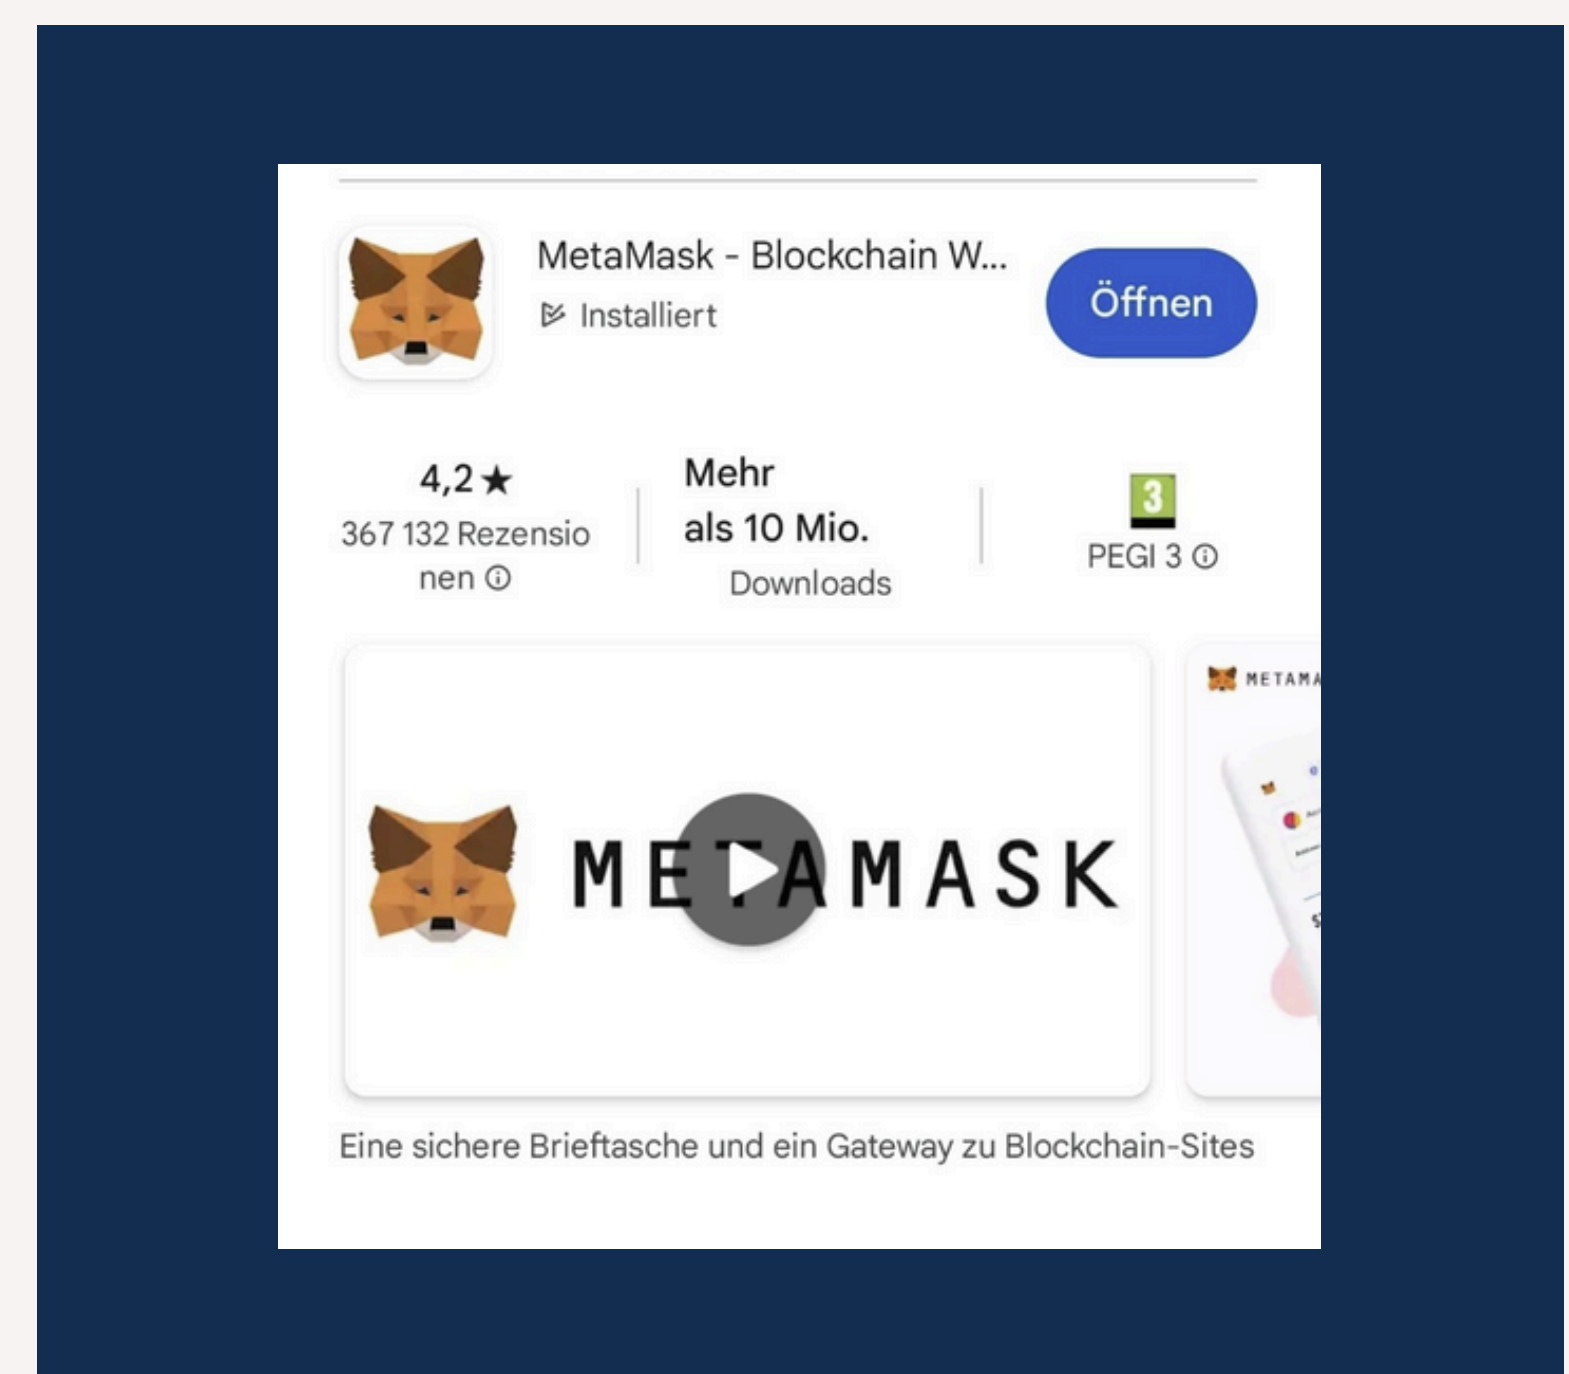

Note: Keep your private keys safe. AlpsCon has no **access** to your wallet and cannot perform any **recovery**.

iPhone

Samsung

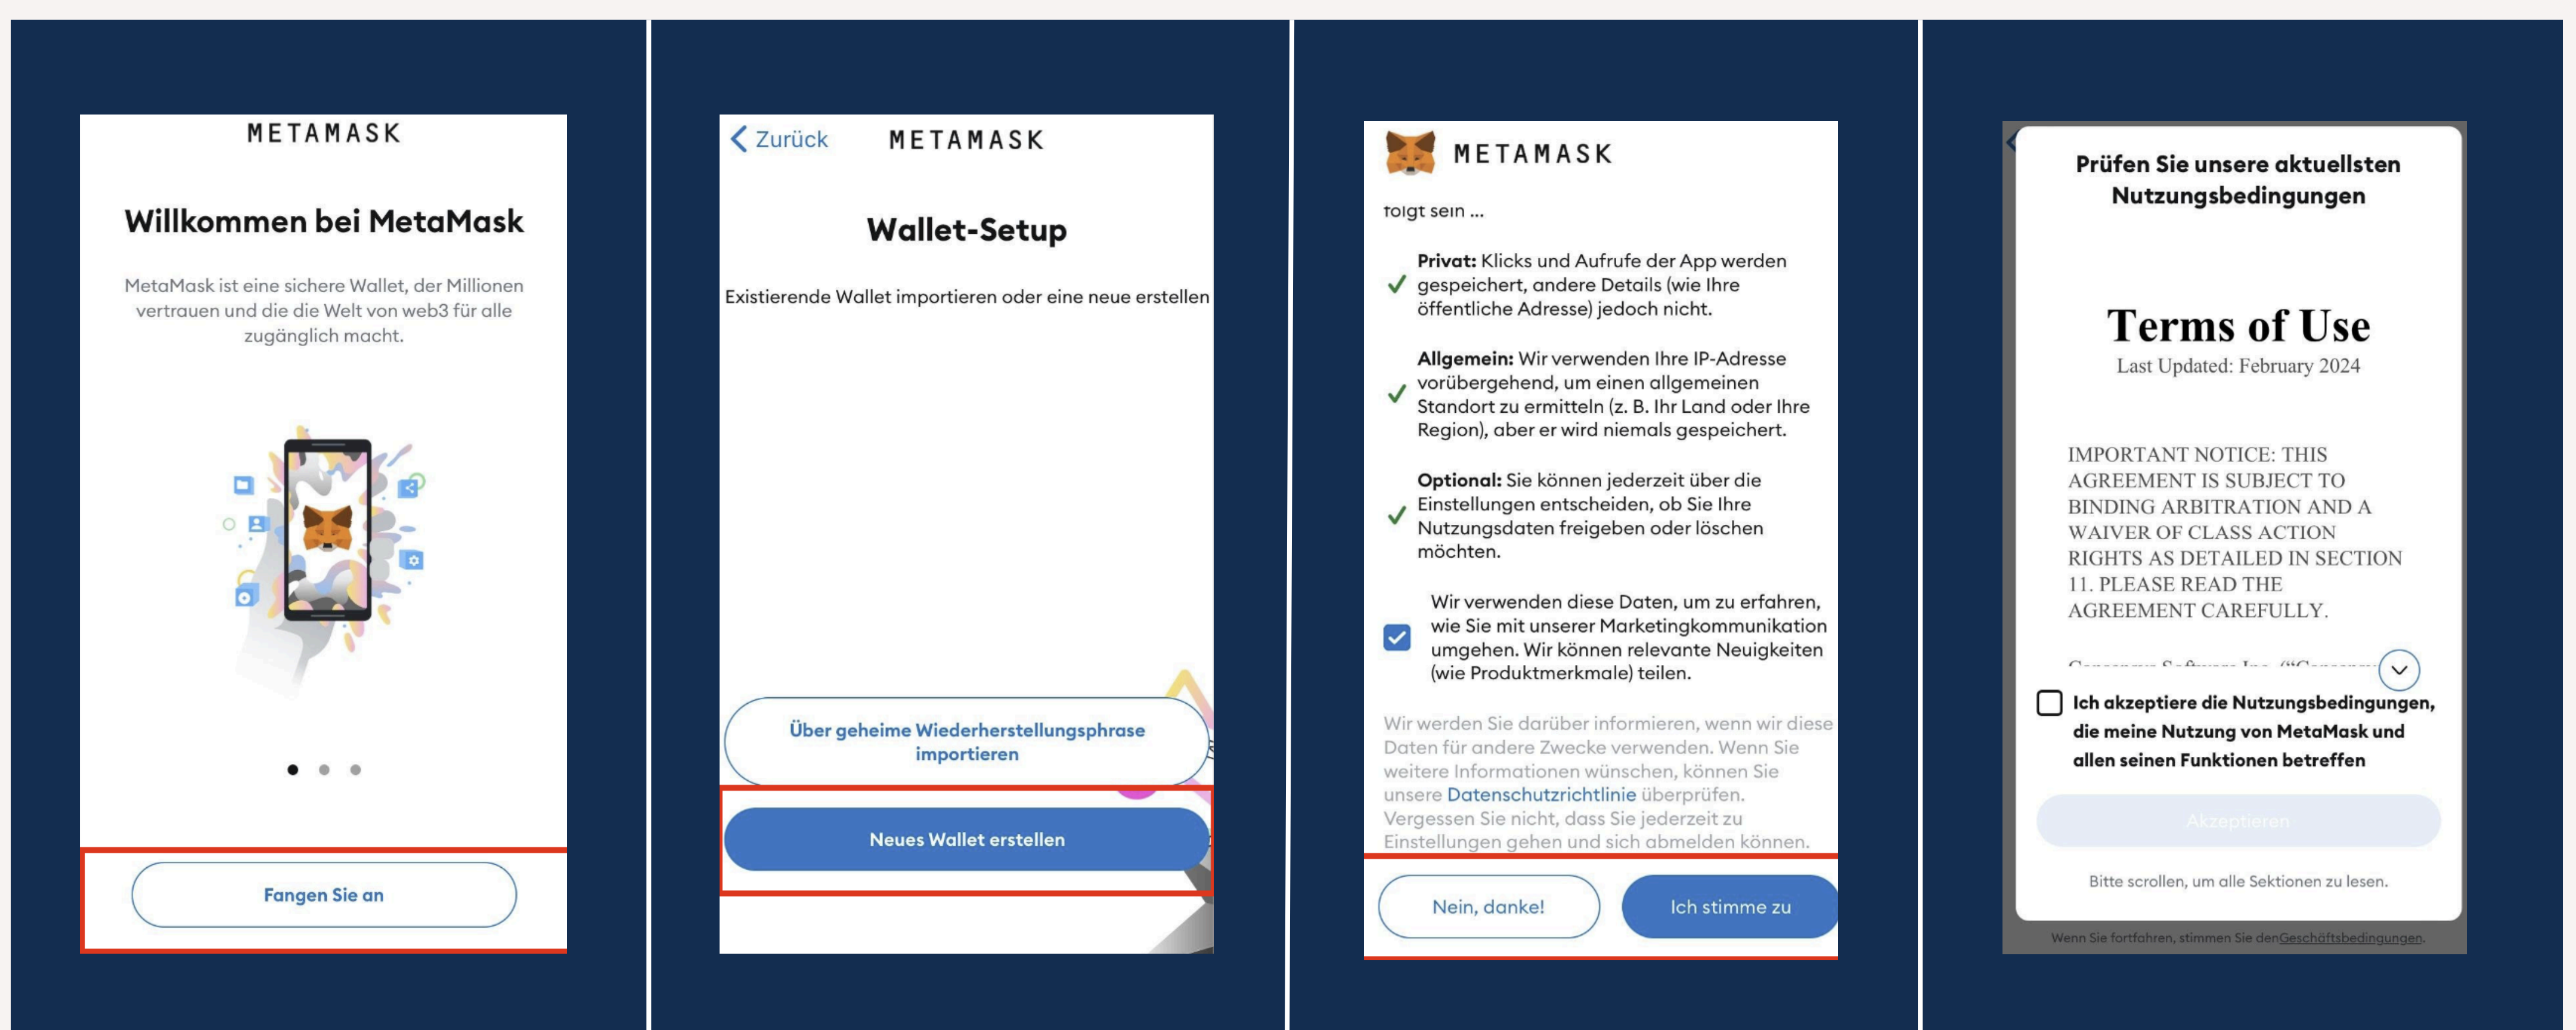

If you already have a MetaMask wallet, open it and skip to page 7.

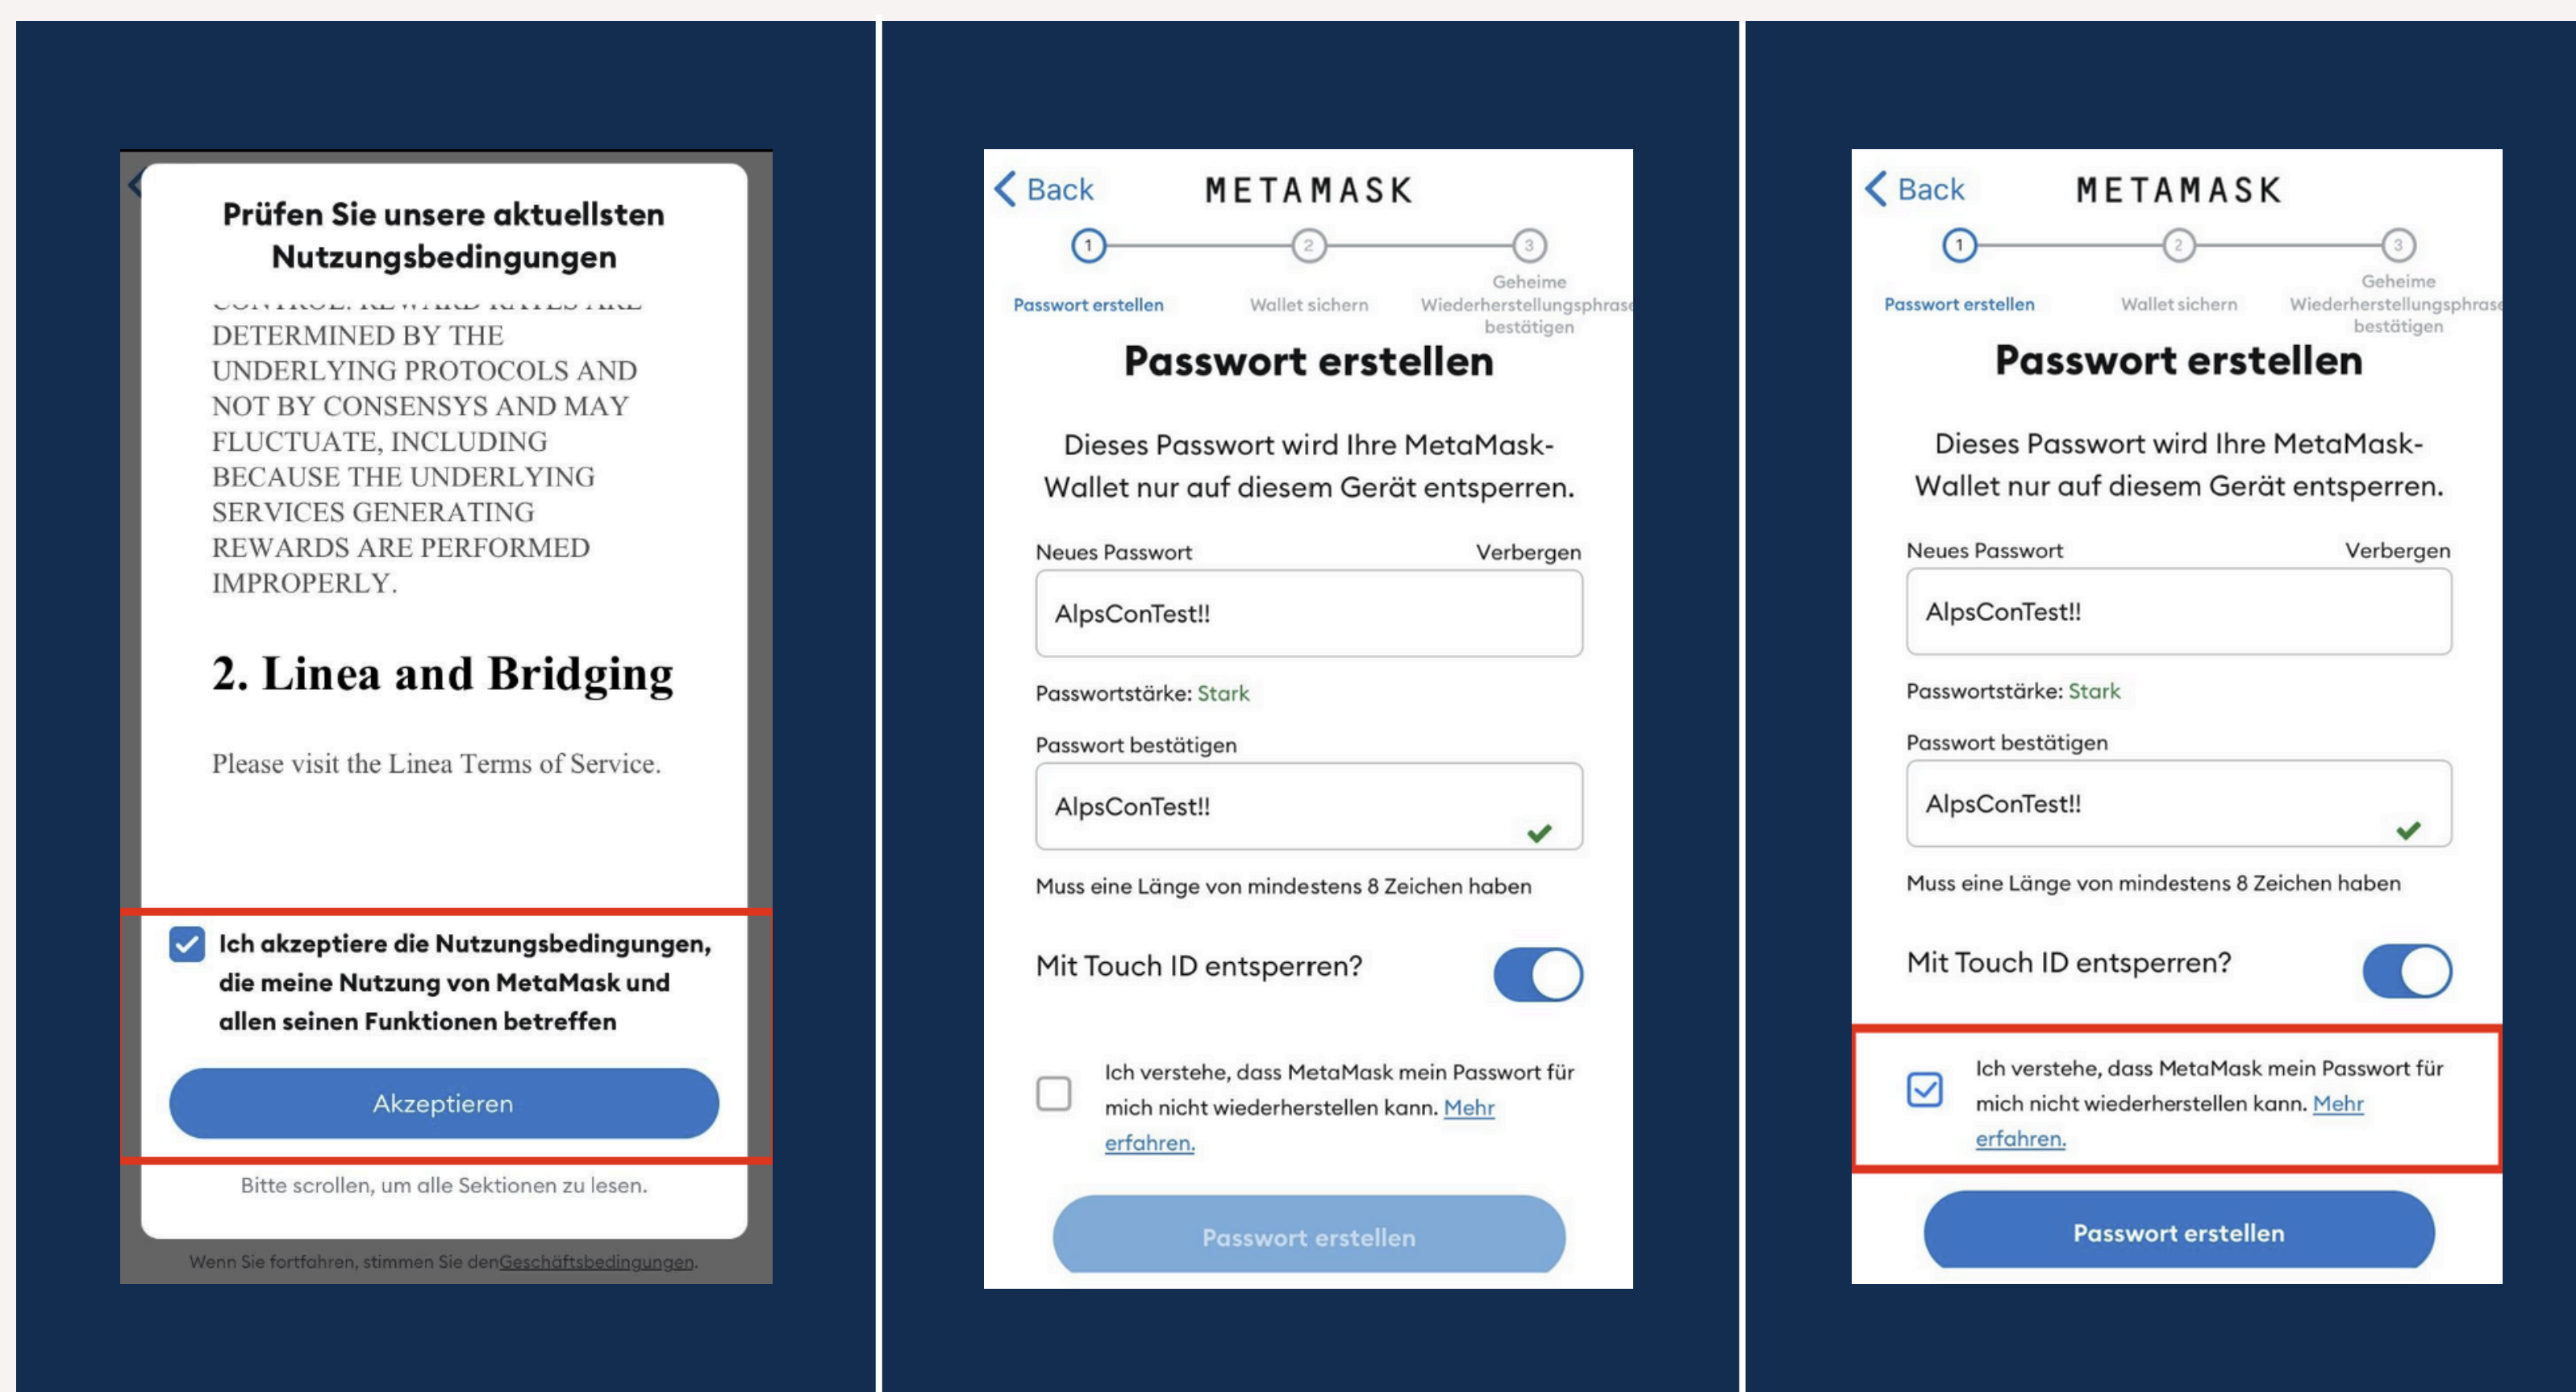

2. First steps – creating a new wallet

Please follow all steps carefully, as this is the basis for successful trading with AI.

3. Registering and verifying with MetaMask

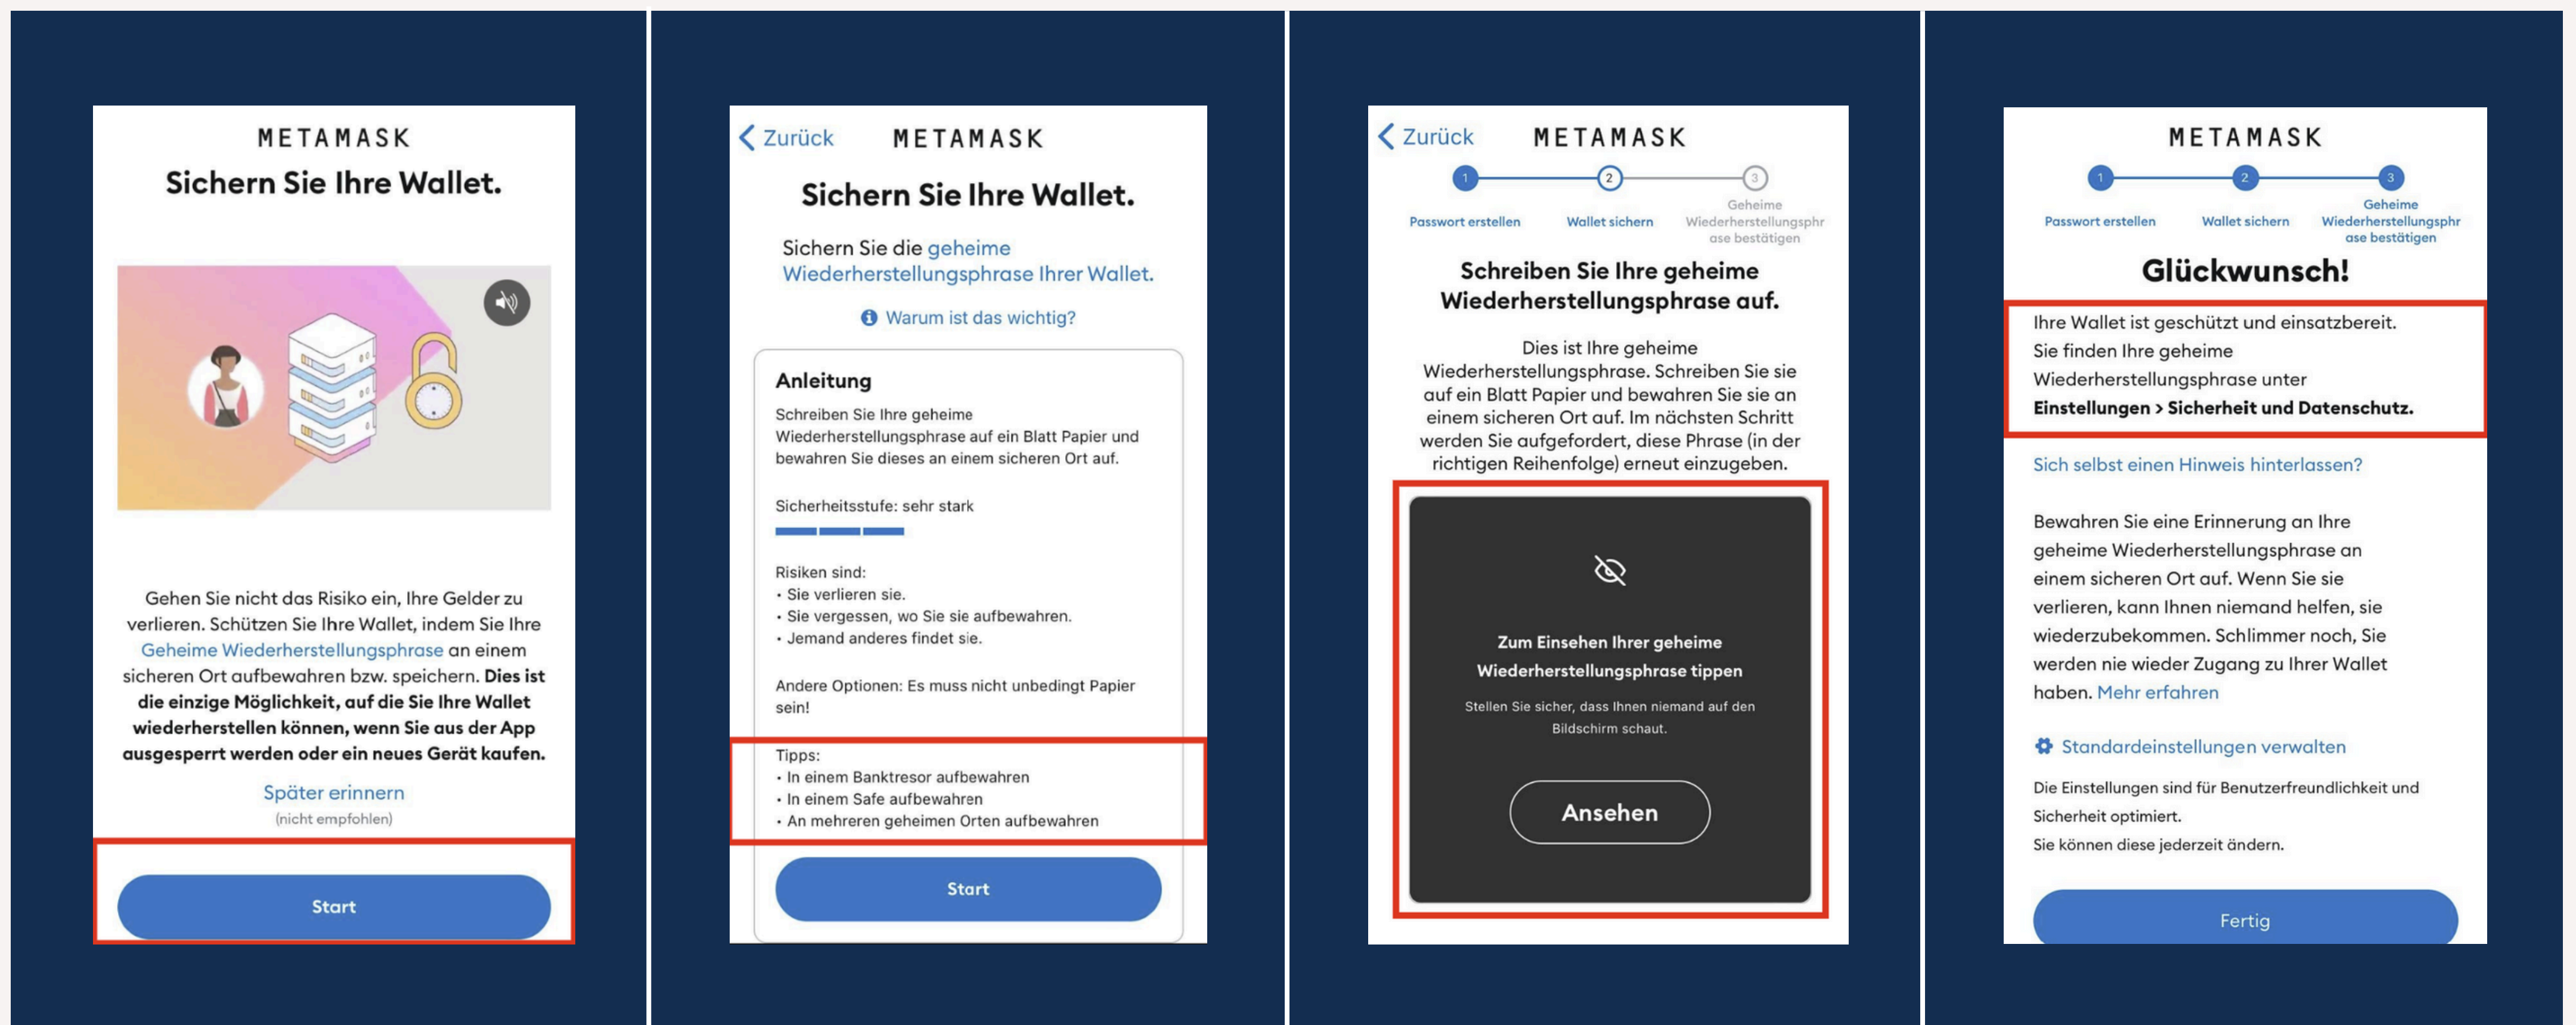

Now create a new wallet and assign a password.

Please make a note of the login details and take care to spell them correctly. This will ensure that you can access your personal wallet at any time and reset your password if you lose it.

AlpsCon has no access to this data and cannot help you if it is lost.

4. Importance of the recovery phrase

Tips for storage & handling

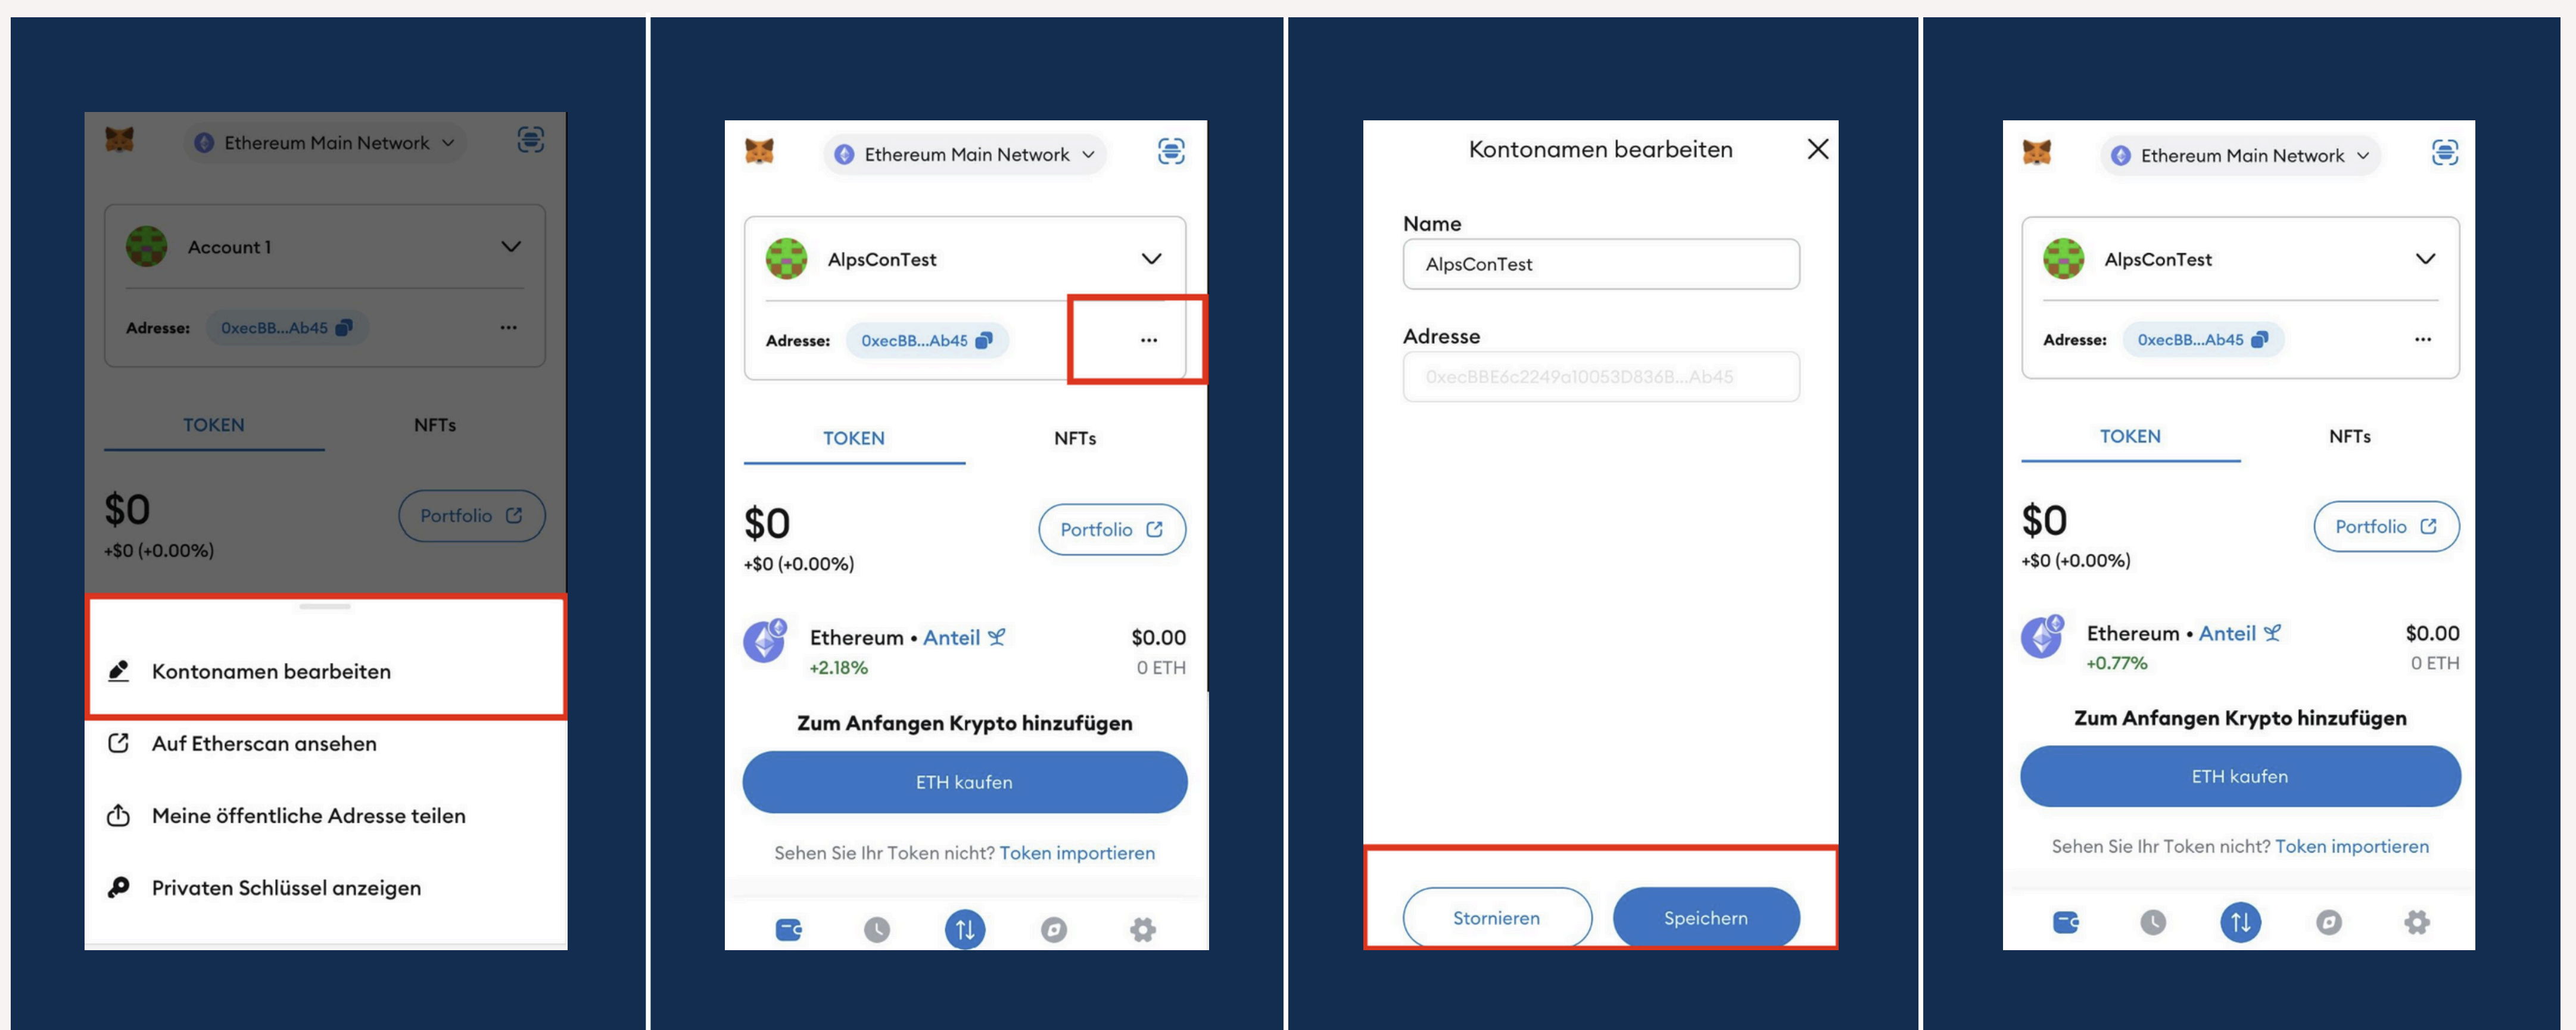

- Keep offline and secure, e.g., on paper, metal plate – not digitally
- Never share – whether by email, chat, or screen sharing
- Do not store in the cloud – Google Drive, iCloud, etc.
- Optional: Back up in a secure location – safe or bank safe deposit box

Keep your private keys safe. AlpsCon has no access to your wallet and cannot perform a recovery.

Congratulations, you have now created your wallet.

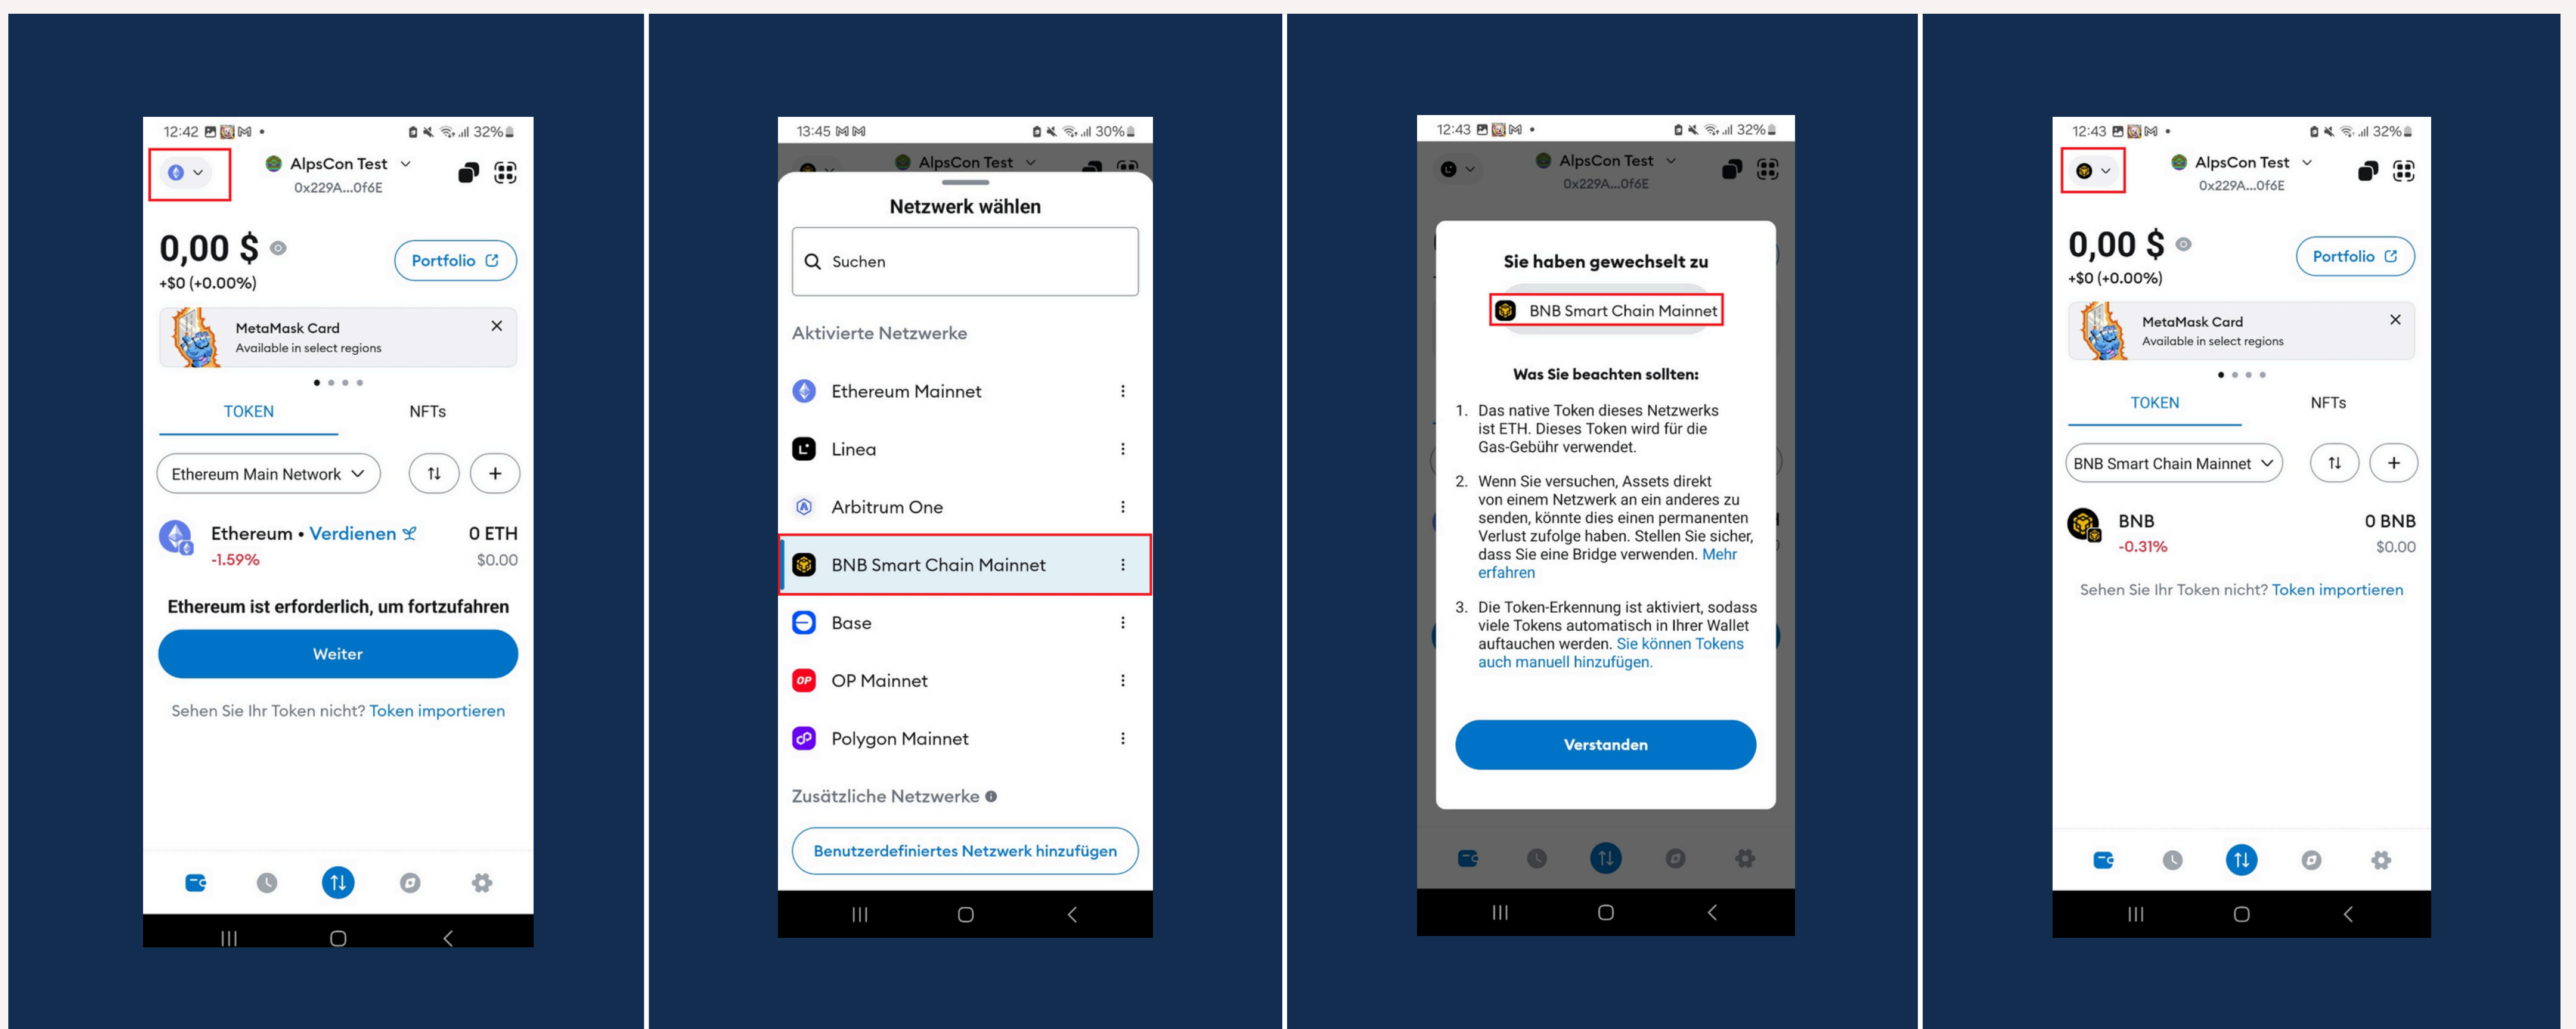

5. Editing account name in MetaMask

Click on **Account 1** at the top and use the **three dots** to change the account name. Simply enter the desired name and click on **save**. Your desired name should now be displayed.

6. Transfer to BNB network

To trade with AlpsCon, we need the BNB network.
You can add this as explained in the images:

1. Click on **Ethereum Main Network** in the top left corner and select **BNB Smart Chain**.
2. Click on the button: **Understood**.
3. The **correct network** should now be displayed in the top left corner.

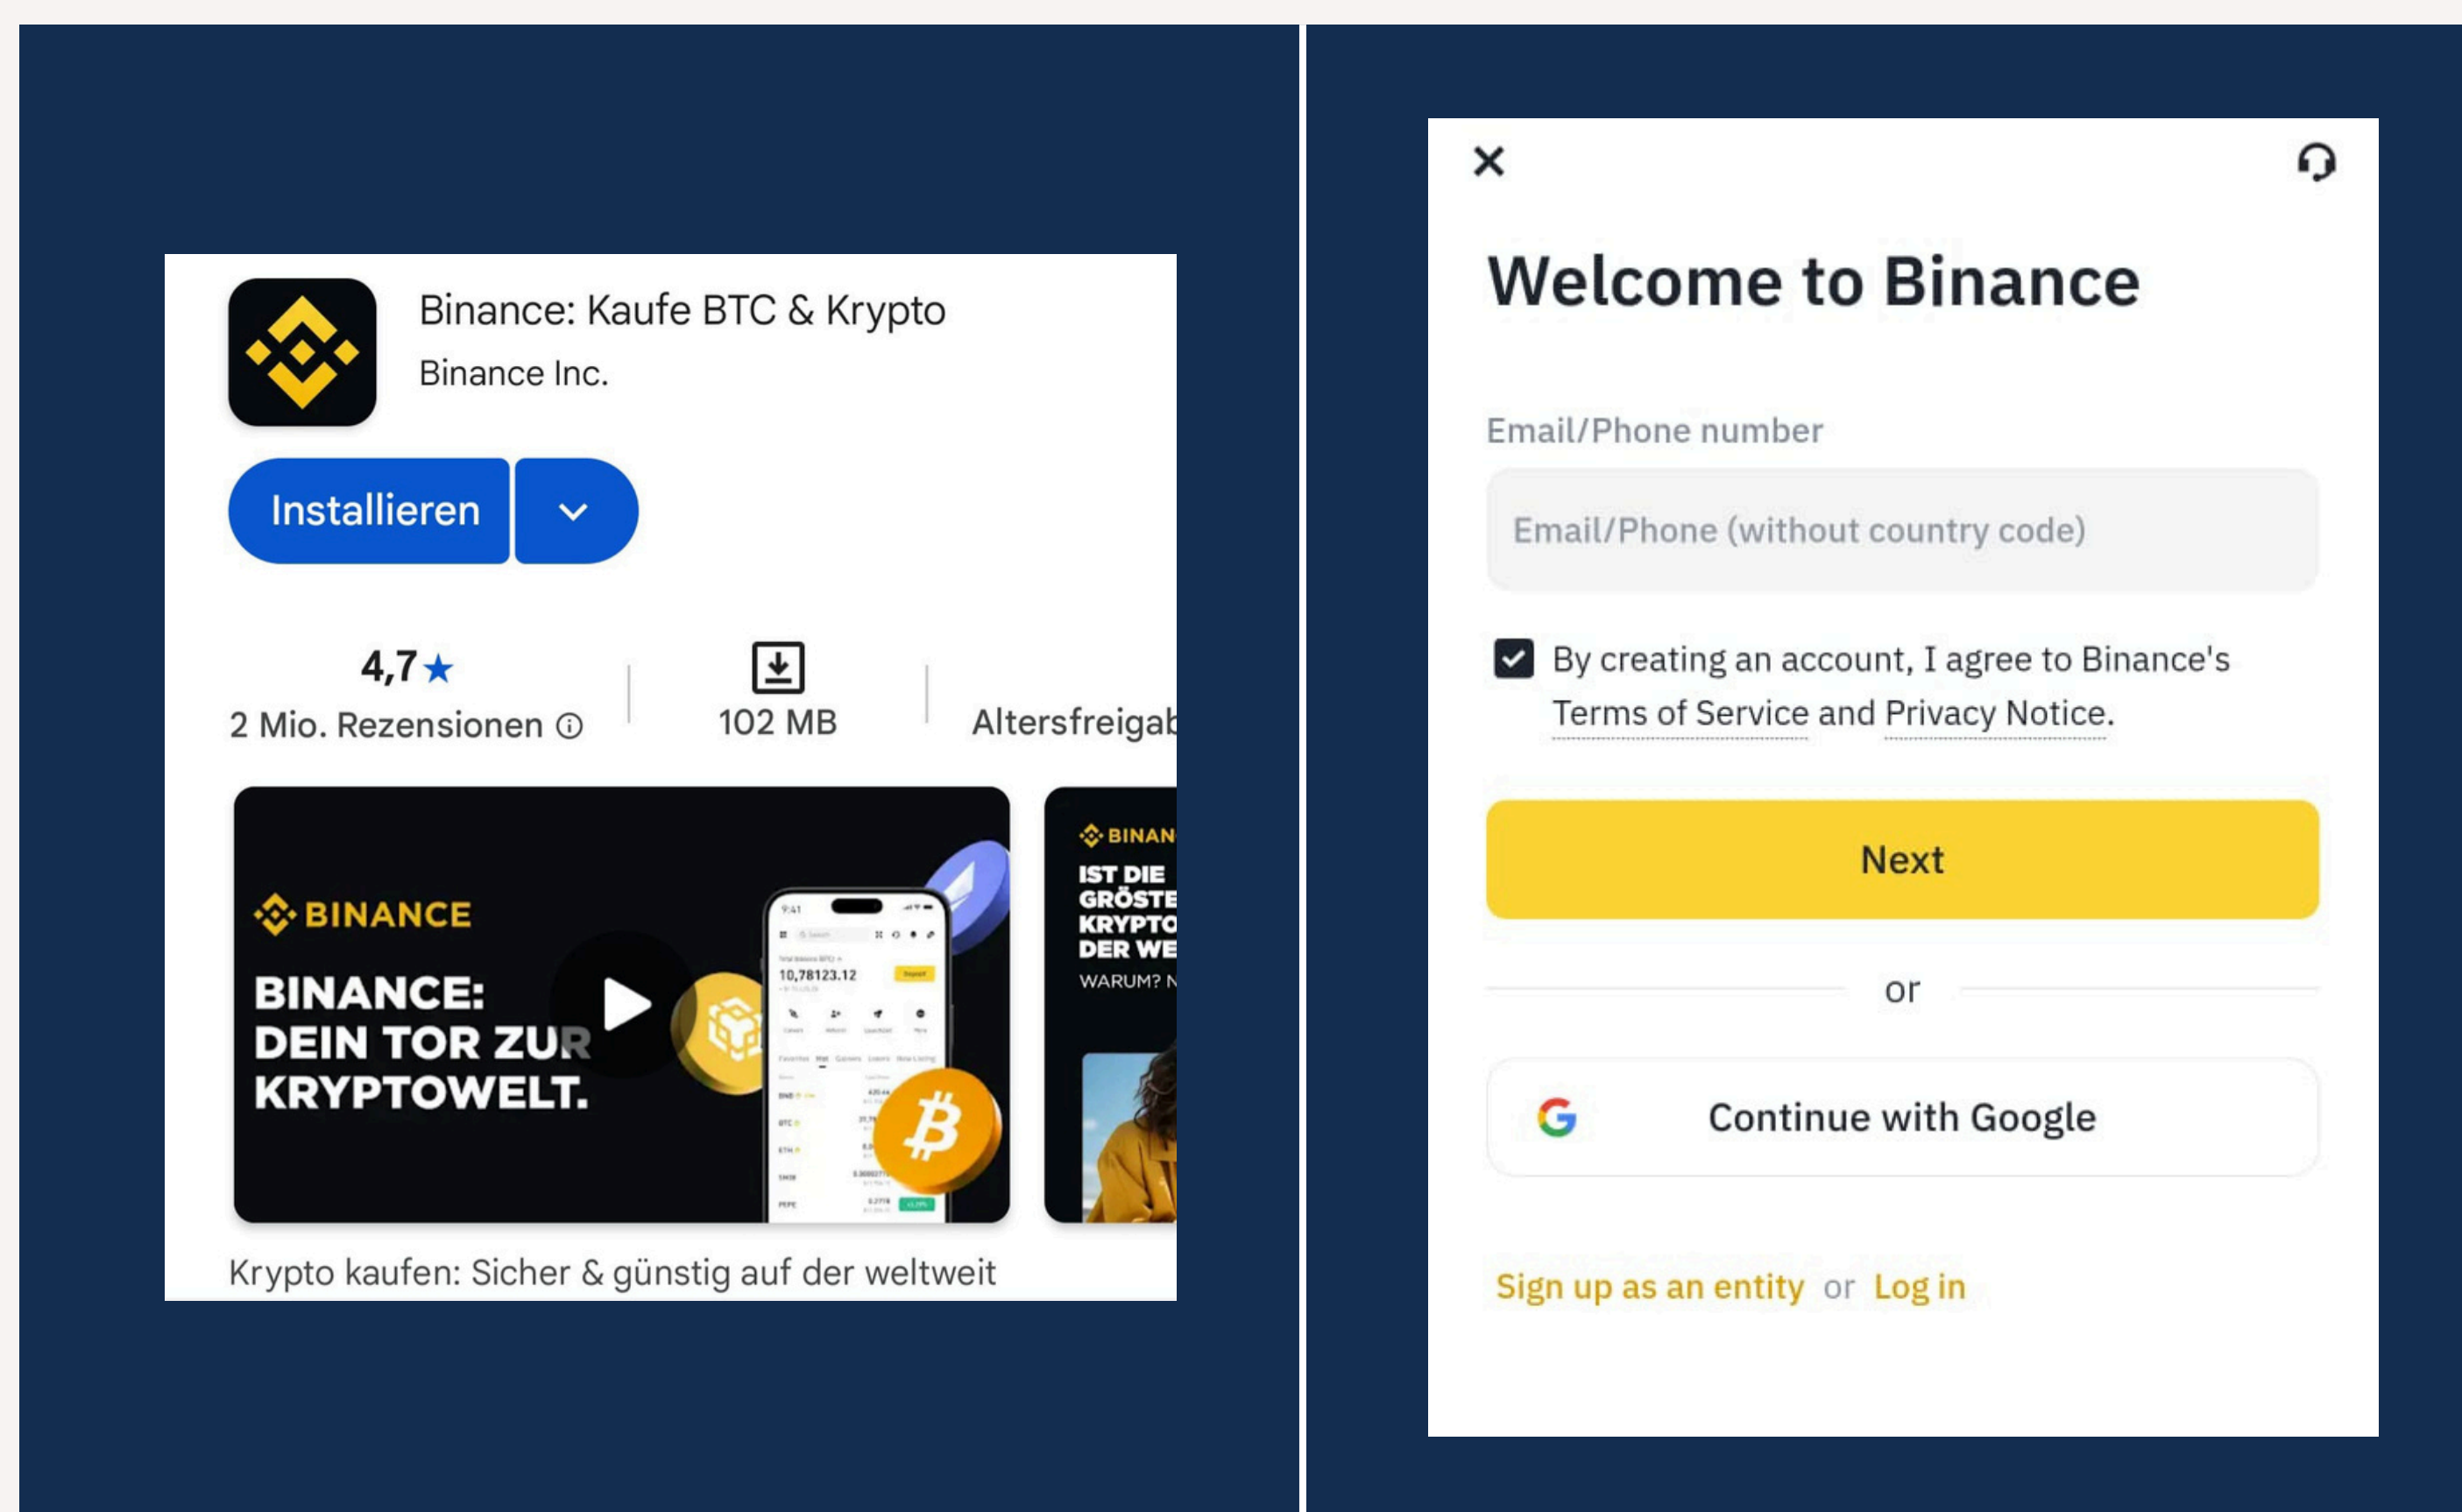

7. Creating a Binance account

To benefit from our trading AI, you need cryptocurrency. As a trusted partner, we recommend **Binance** as a cryptocurrency exchange.

1. Open the App Store (iPhone) or Play Store (Android).
2. Search for **Binance** and click Install.
3. Follow the setup instructions in the app to create your personal account.

Note: Keep your private keys safe. AlpsCon has no **access** to your wallet and cannot perform any **recovery**.

Please follow the process and create an account, complete KYC verification, so that you can then deposit money or cryptocurrencies.

9. Exchanging euros for cryptocurrency

The first screenshot shows a 'Total Balance' of 999,00 EUR (equivalent to 1137,36 \$). Below the balance, there are 'Available' and 'Unavailable' amounts, both at 999,00 and 0,00 respectively. A green 'Convert' button is visible, with a hand pointing to it.

The second screenshot shows the conversion interface. The 'From' currency is EUR (999) and the 'To' currency is USDC (1130.21439072). A green box with the text 'No fee' is overlaid on the screen. Below this is a 'Confirm Order' screen showing the conversion details: 999 EUR to 1,130.5517442 USDC. The transaction type is 'Instant' and the fees are 0 USDC.

The third screenshot shows the 'Conversion Details' screen. It displays '+1130,5517442 USDC' with a green checkmark and the word 'Completed'. Below this, it lists transaction details: Type: INSTANT, From: 999 EUR, Transaction Fees: 0 USDC, Rate: 1 EUR = 1.13168 USDC, and Trade Date: 2025-04-30 08:30:06.

Now we send the USDC from Binance to MetaMask.

The first screenshot shows a 'Total Balance' of 110,41 \$. Below the balance, there are 'Take Out' and 'Add Funds' buttons. A hand points to the 'Take Out' button, which is labeled with a blue '1'. Below this is an 'Allocation' chart showing the distribution of assets: Bitcoin (95,04%), Euro (4,73%), BNB (0,23%), and Others (<0.01%).

The second screenshot shows the 'Select Method' screen. There are two options: 'Withdraw' (Send to a known crypto address via crypto network) and 'Sell Crypto' (Sell crypto to your financial account). A hand points to the 'Withdraw' option, which is labeled with a blue '2'.

10. Transfer from Binance to MetaMask

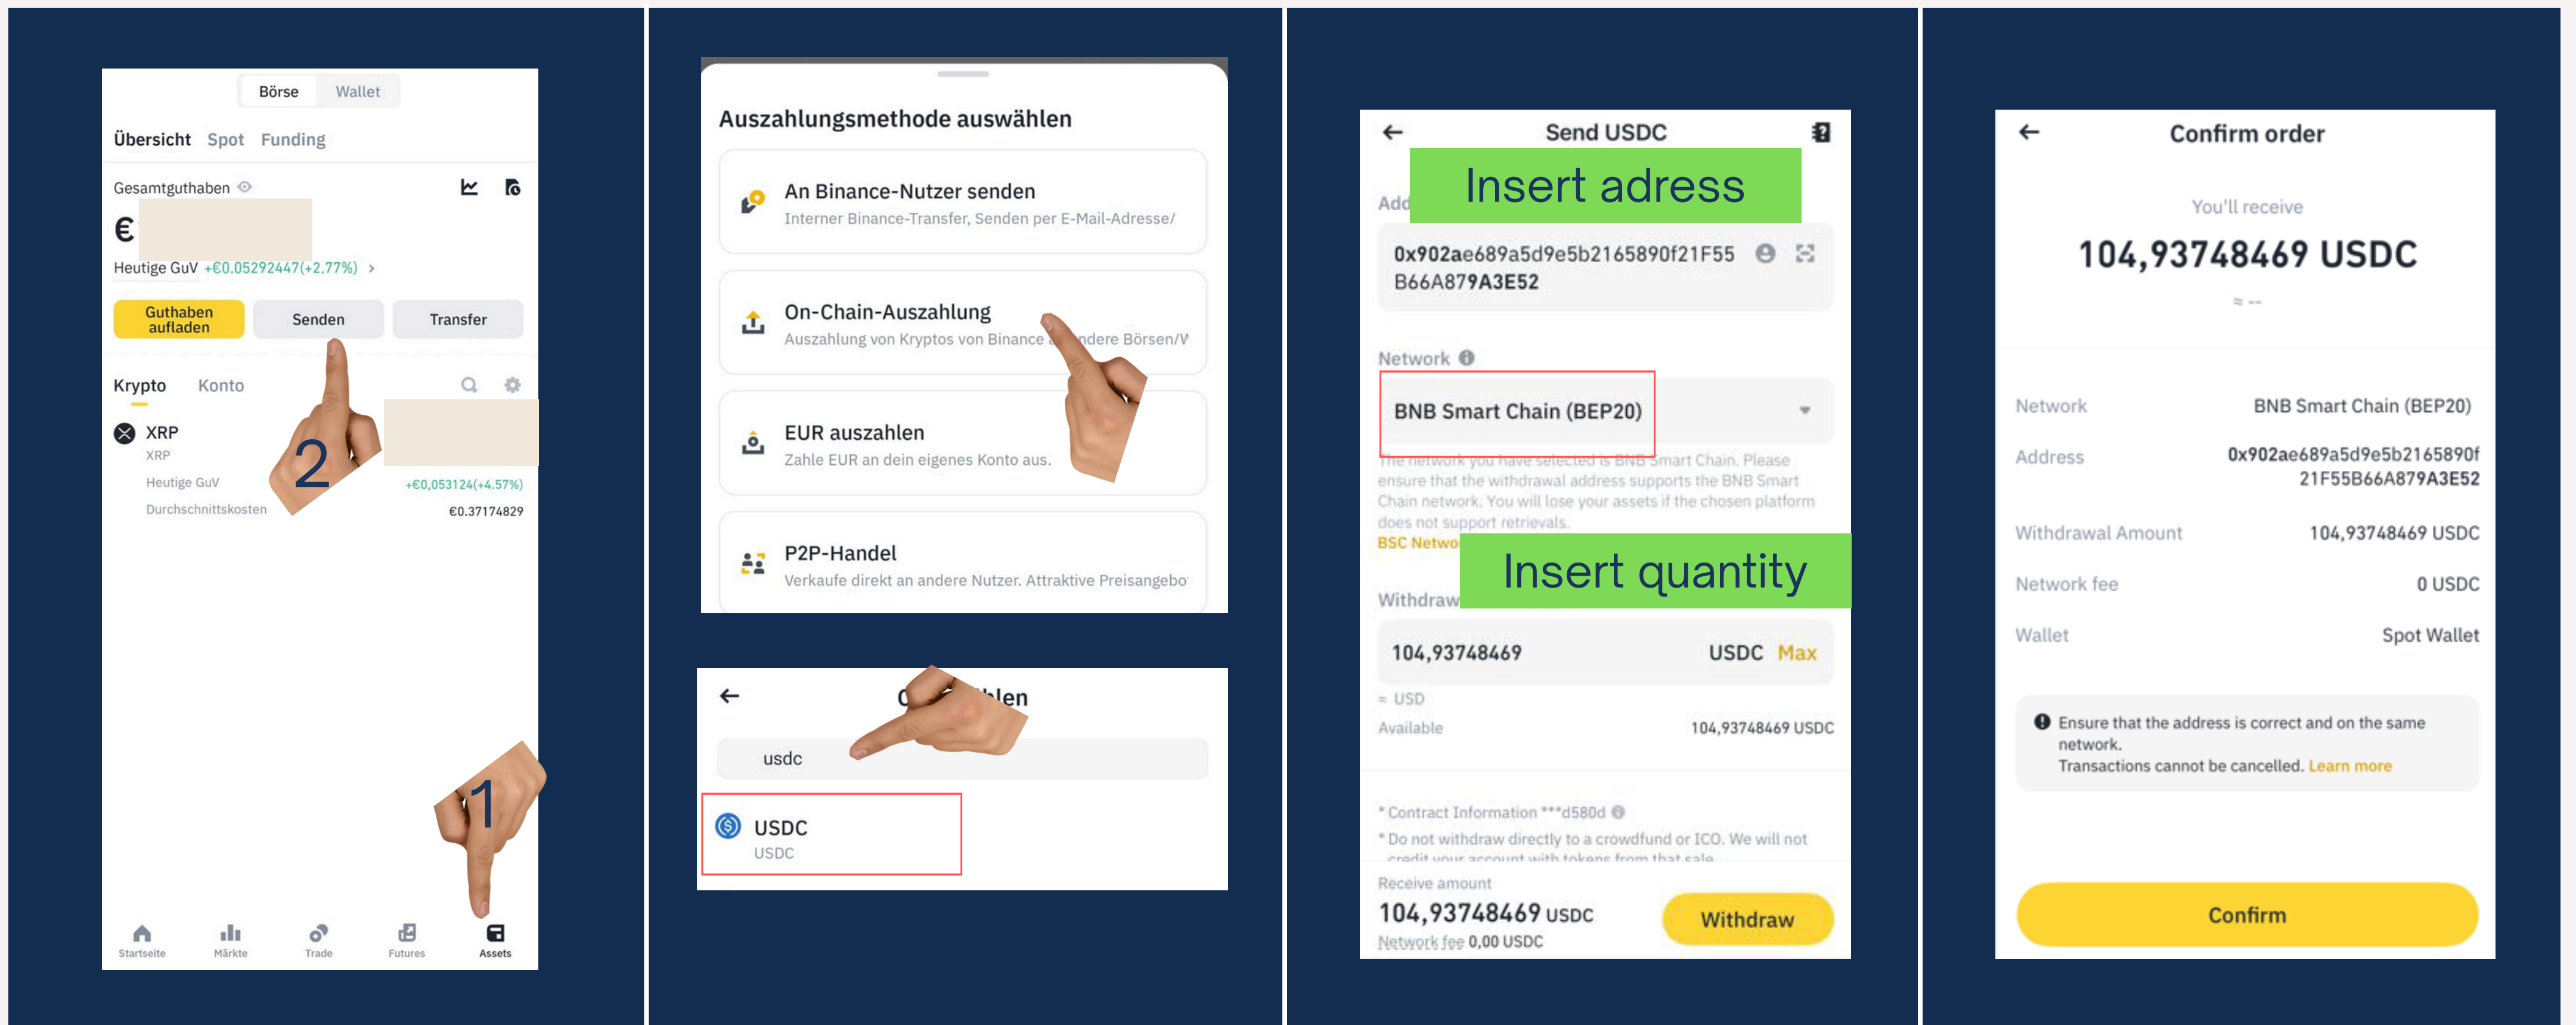

This process requires your utmost attention; there is no room for error here!

The screenshots illustrate the following steps:

- Accessing the token import menu from the main portfolio view.
- Searching for 'USD' and selecting 'USD Coin (USDC)' from the list.
- Confirming the import of the token.
- Verifying that the token is now listed in the portfolio.
- Viewing the price chart for USDC and selecting the 'Empfangen' (Receive) option.
- Scanning the QR code to receive the token, with a note: "That has to stand".

Now let's go back to the Binance app.

Withdrawal Processing
104.93748469 USDC
Estimated completion time: 2025-04-02 19:12:11.
You will receive an email once withdrawal is completed.
View history for the latest updates.

You will receive a confirmation email when the process is complete.

\$509.63
\$-1.73 (-0.34%)
Portfolio

TOKEN

BNB Chain

USD Coin
-0.29%

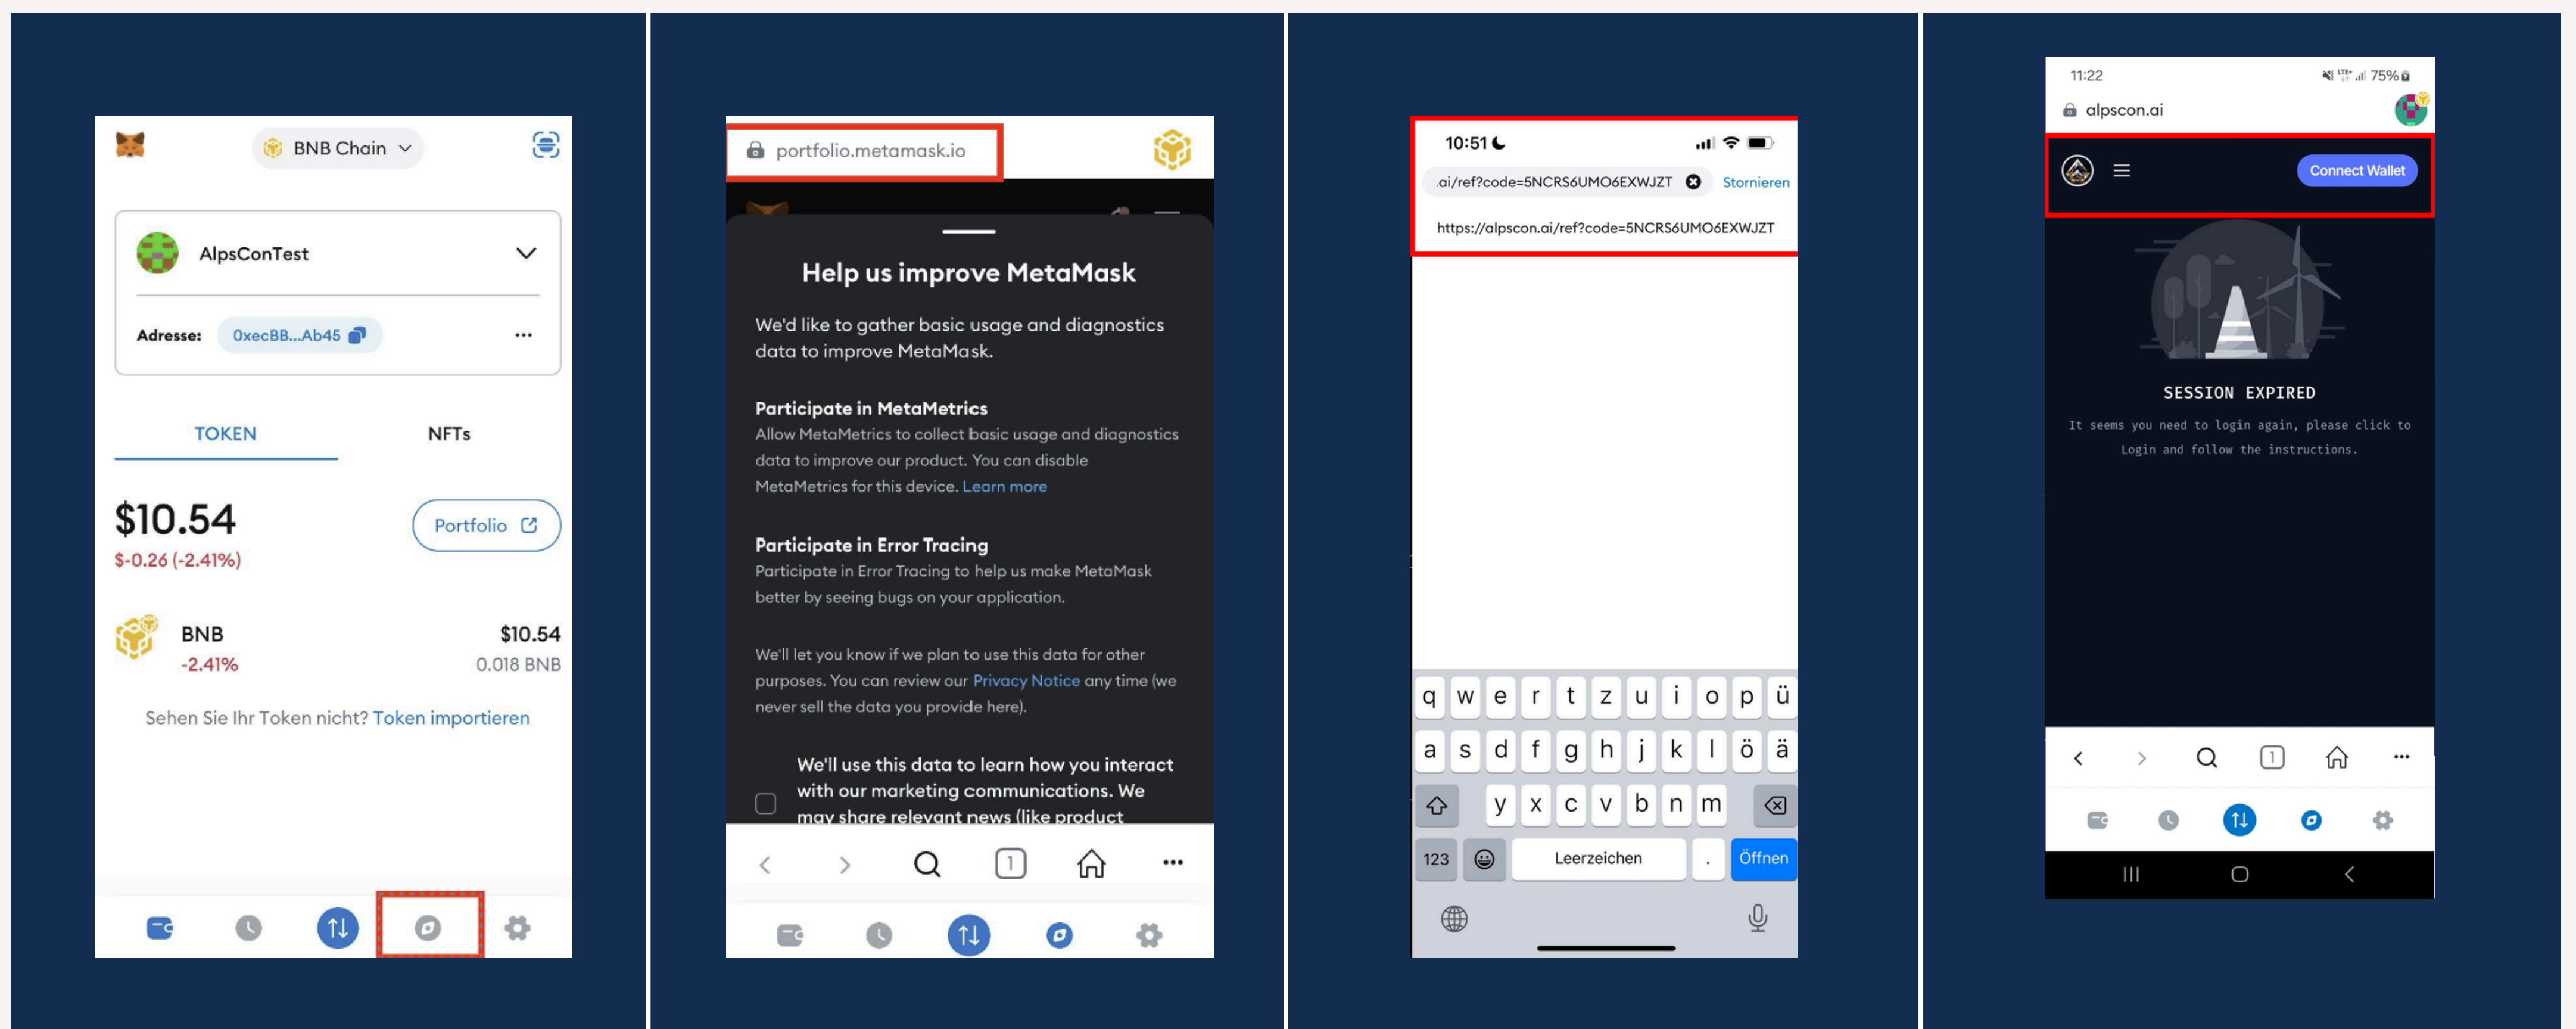

\$479.54
480.06362 USDC

The amount of USDC should now be visible in your MetaMask wallet.

Now you have made all the preparations and are a lot closer to your goal.

11. Connect to AlpsCon

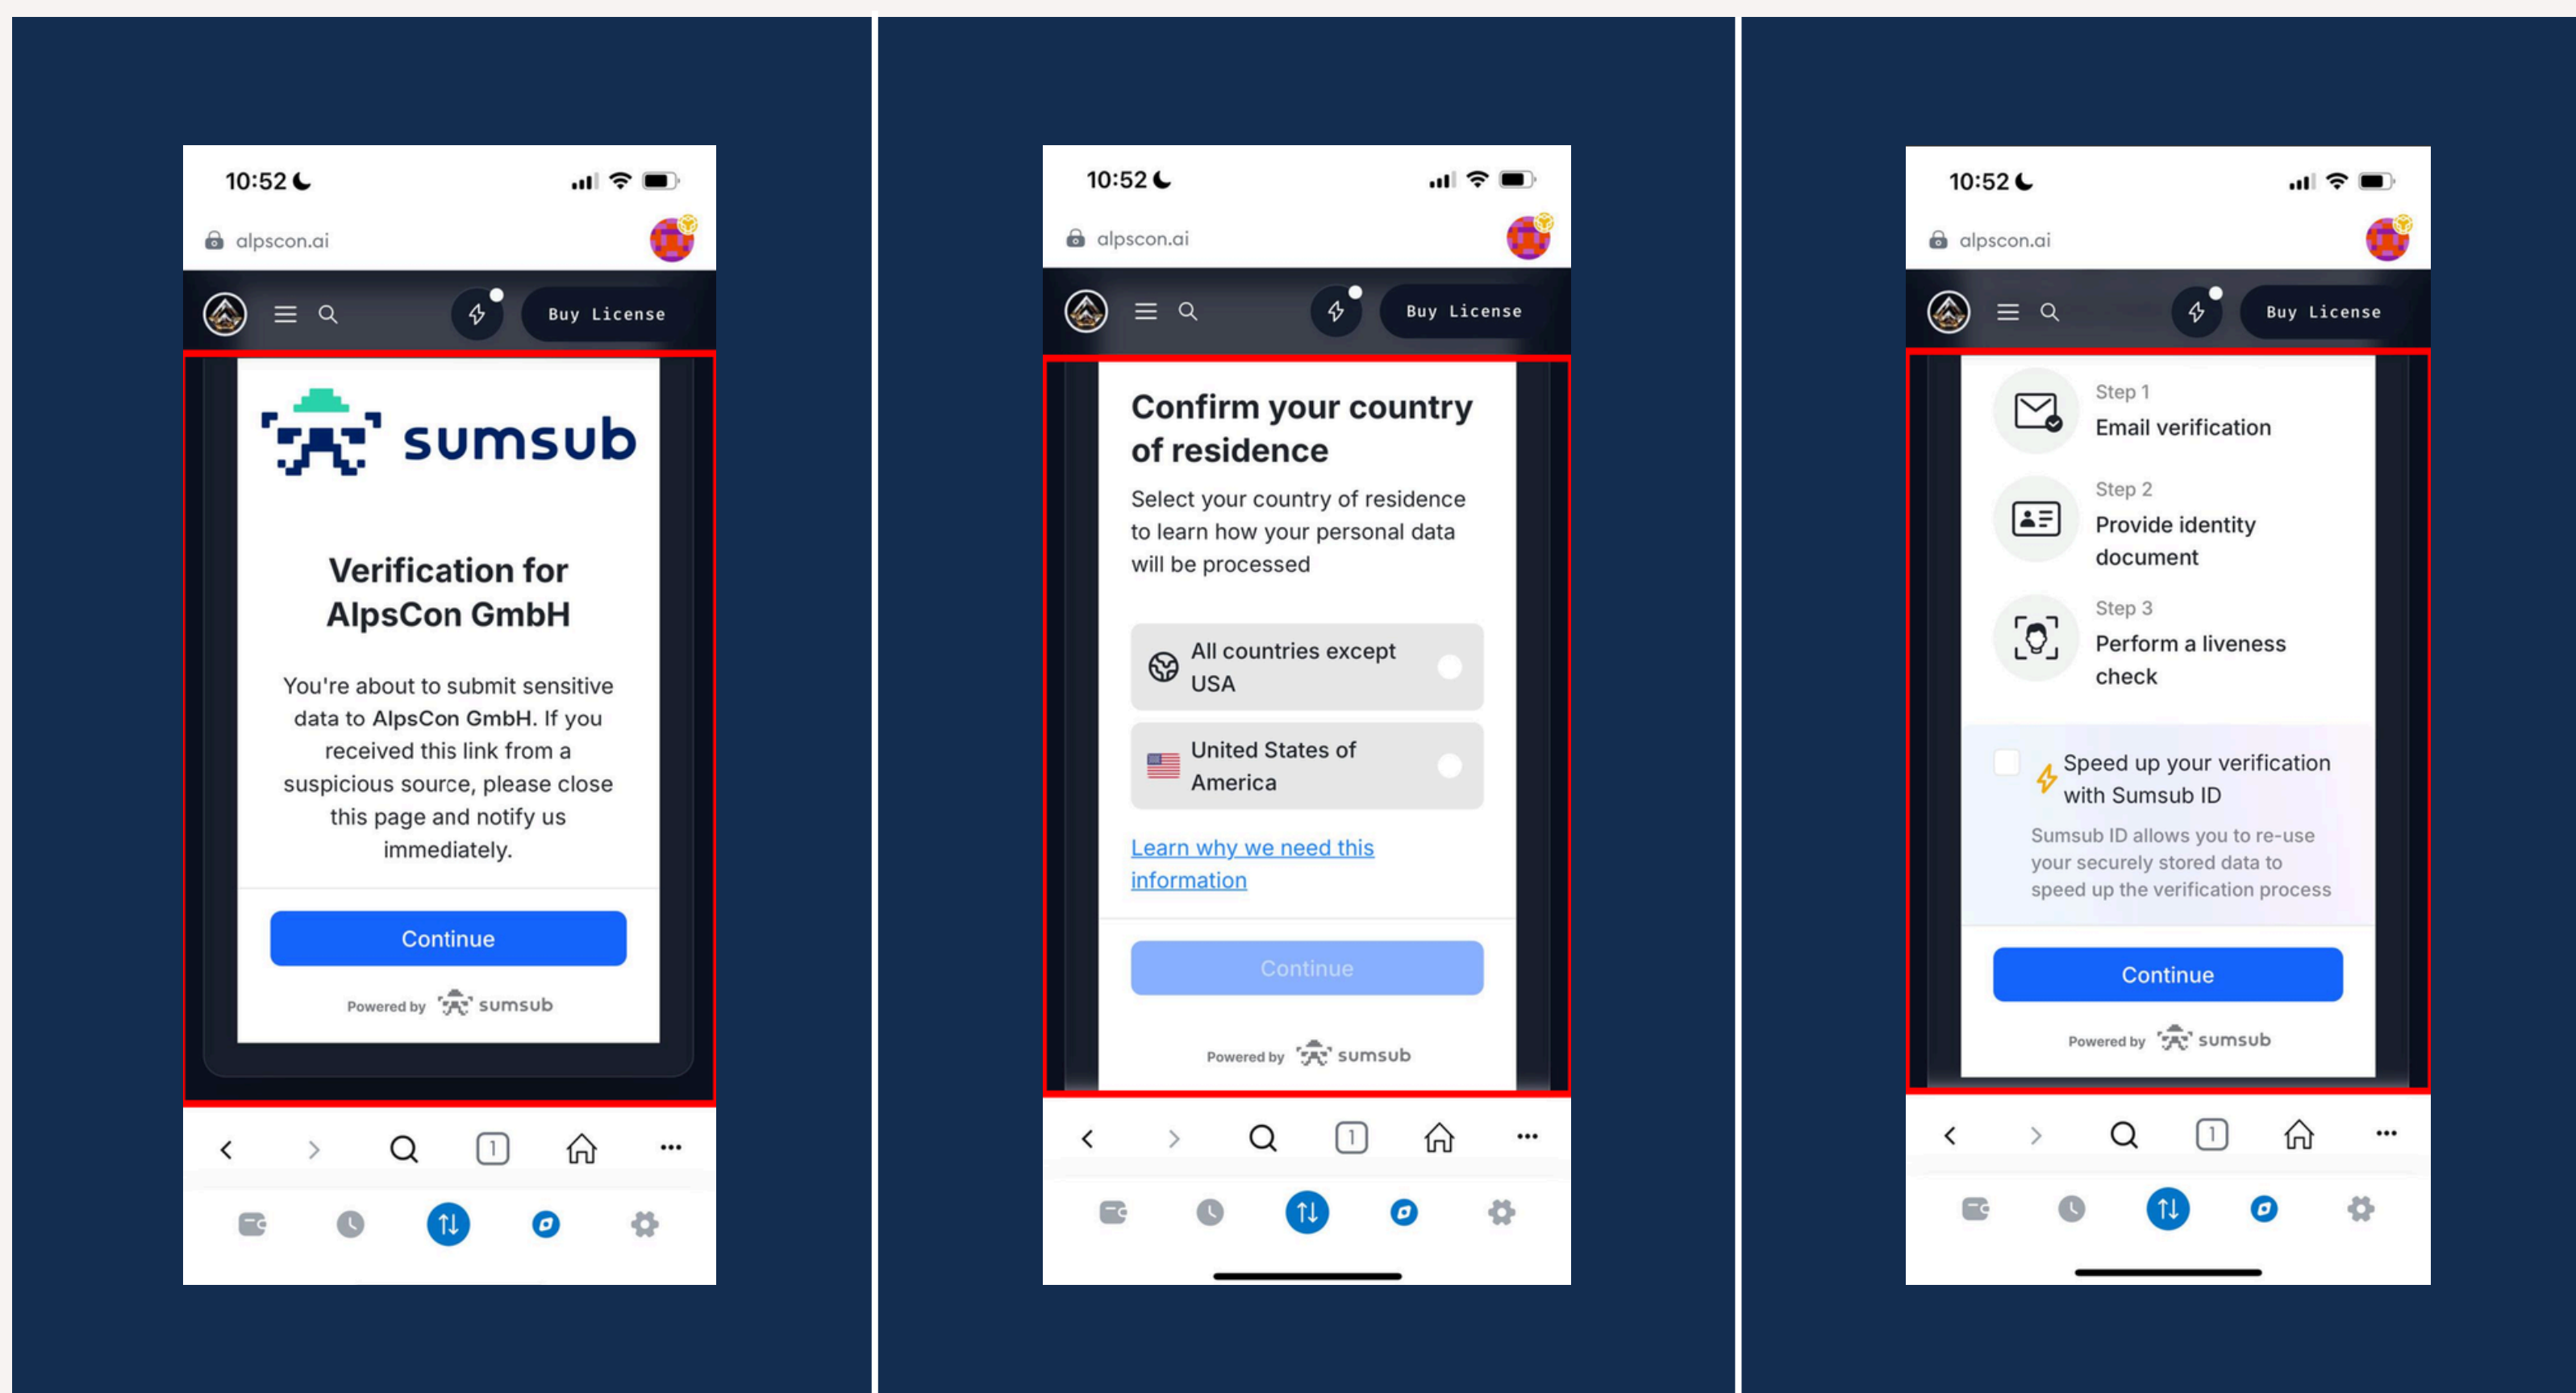

Next, click on the **compass needle** (see photo 1) and enter the **referral link of your sponsor**.

You should now be taken directly to the AlpsCon website.
Click on **Connect Wallet** to establish the connection with AlpsCon and your Metamask wallet.

12. KYC/KYB verification

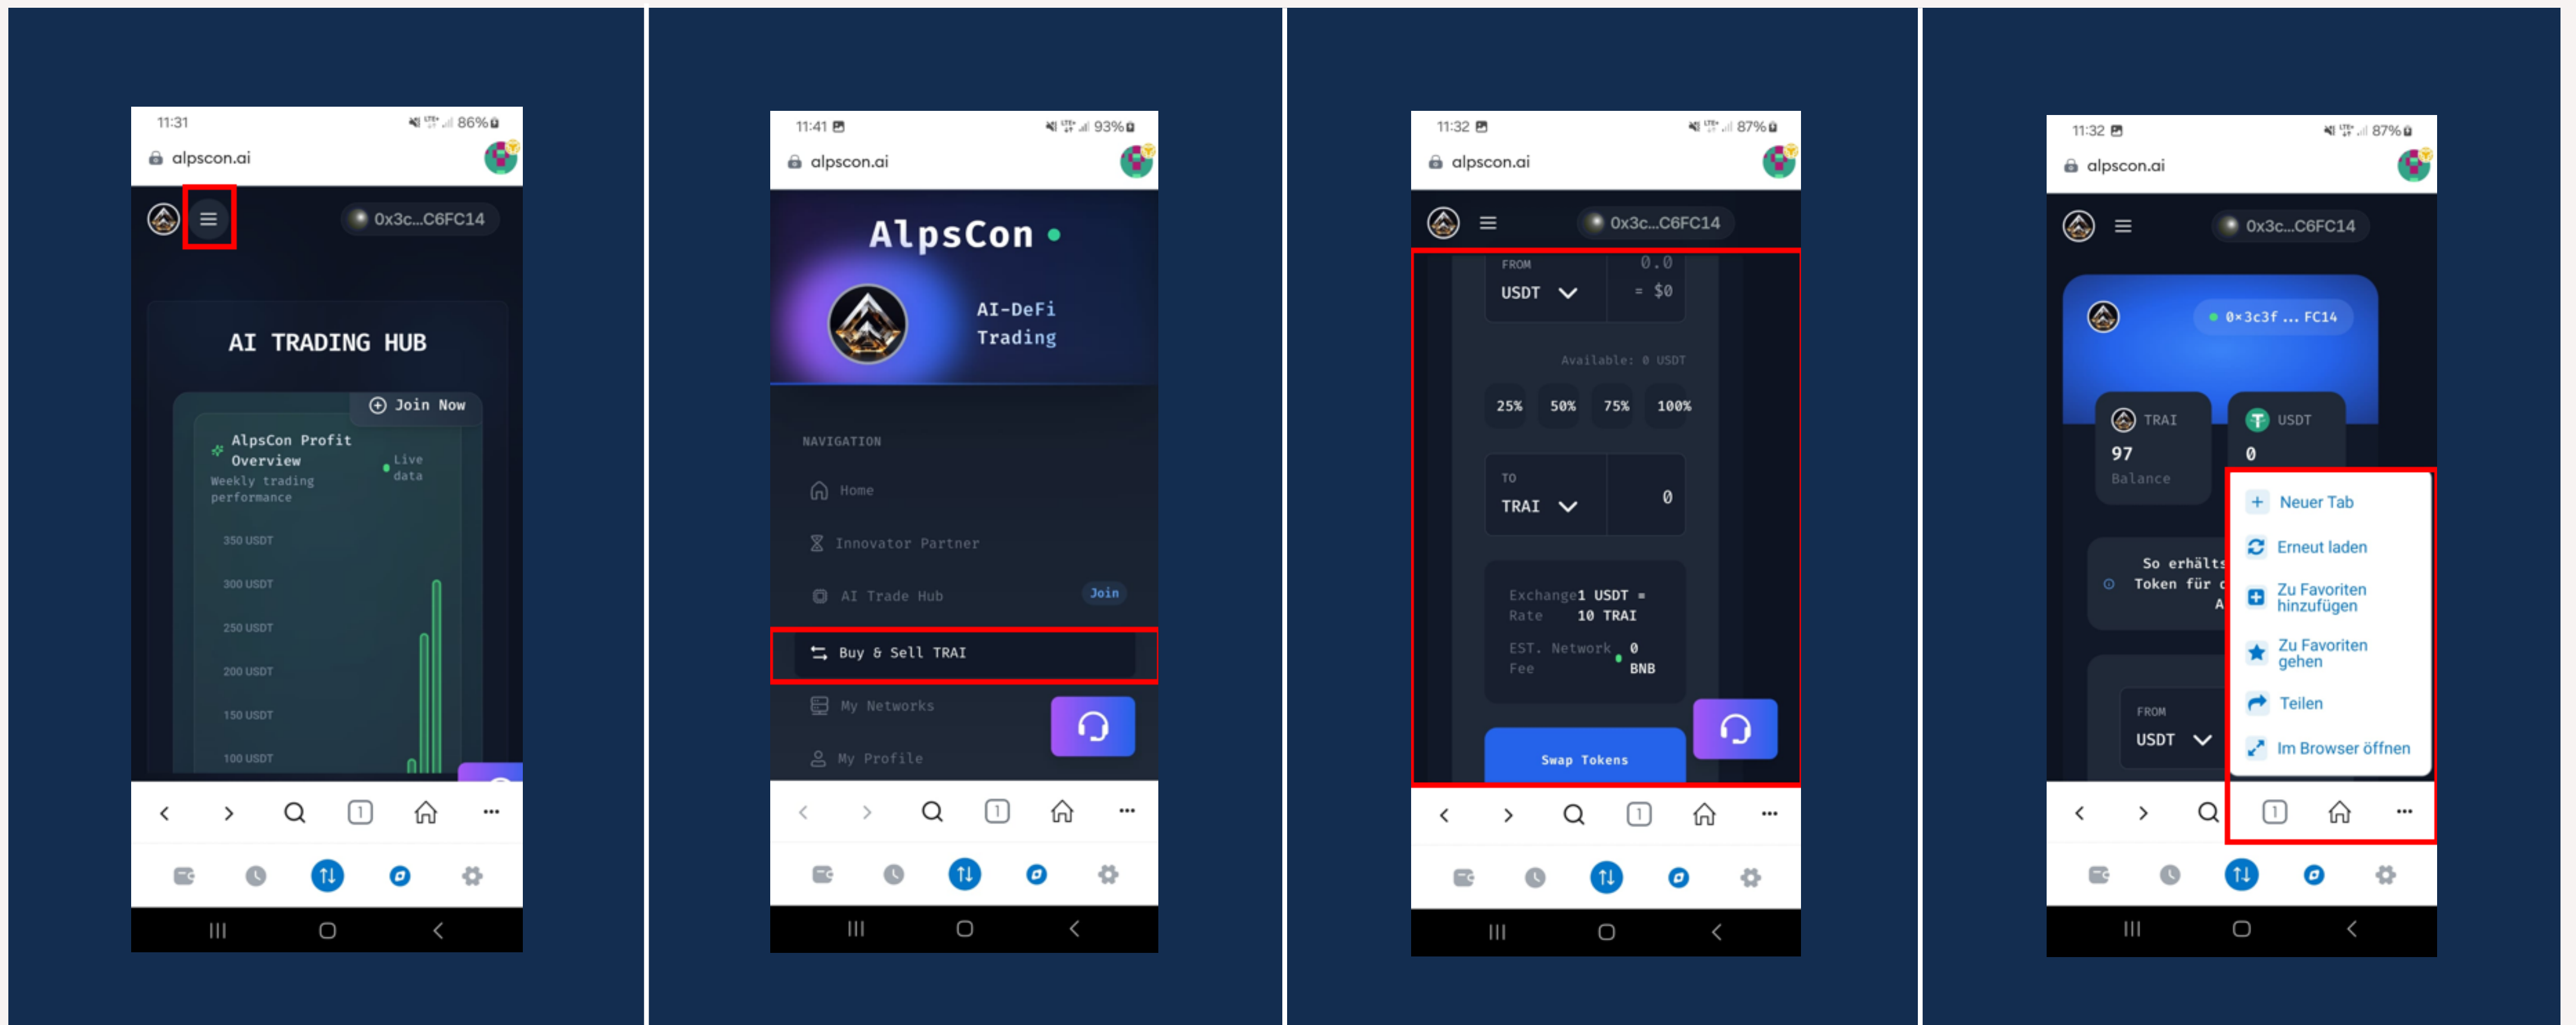

Now follow the next steps for verification.

Congratulations! You are now successfully connected to AlpsCon!

You are very close to your goal, just a few steps away.

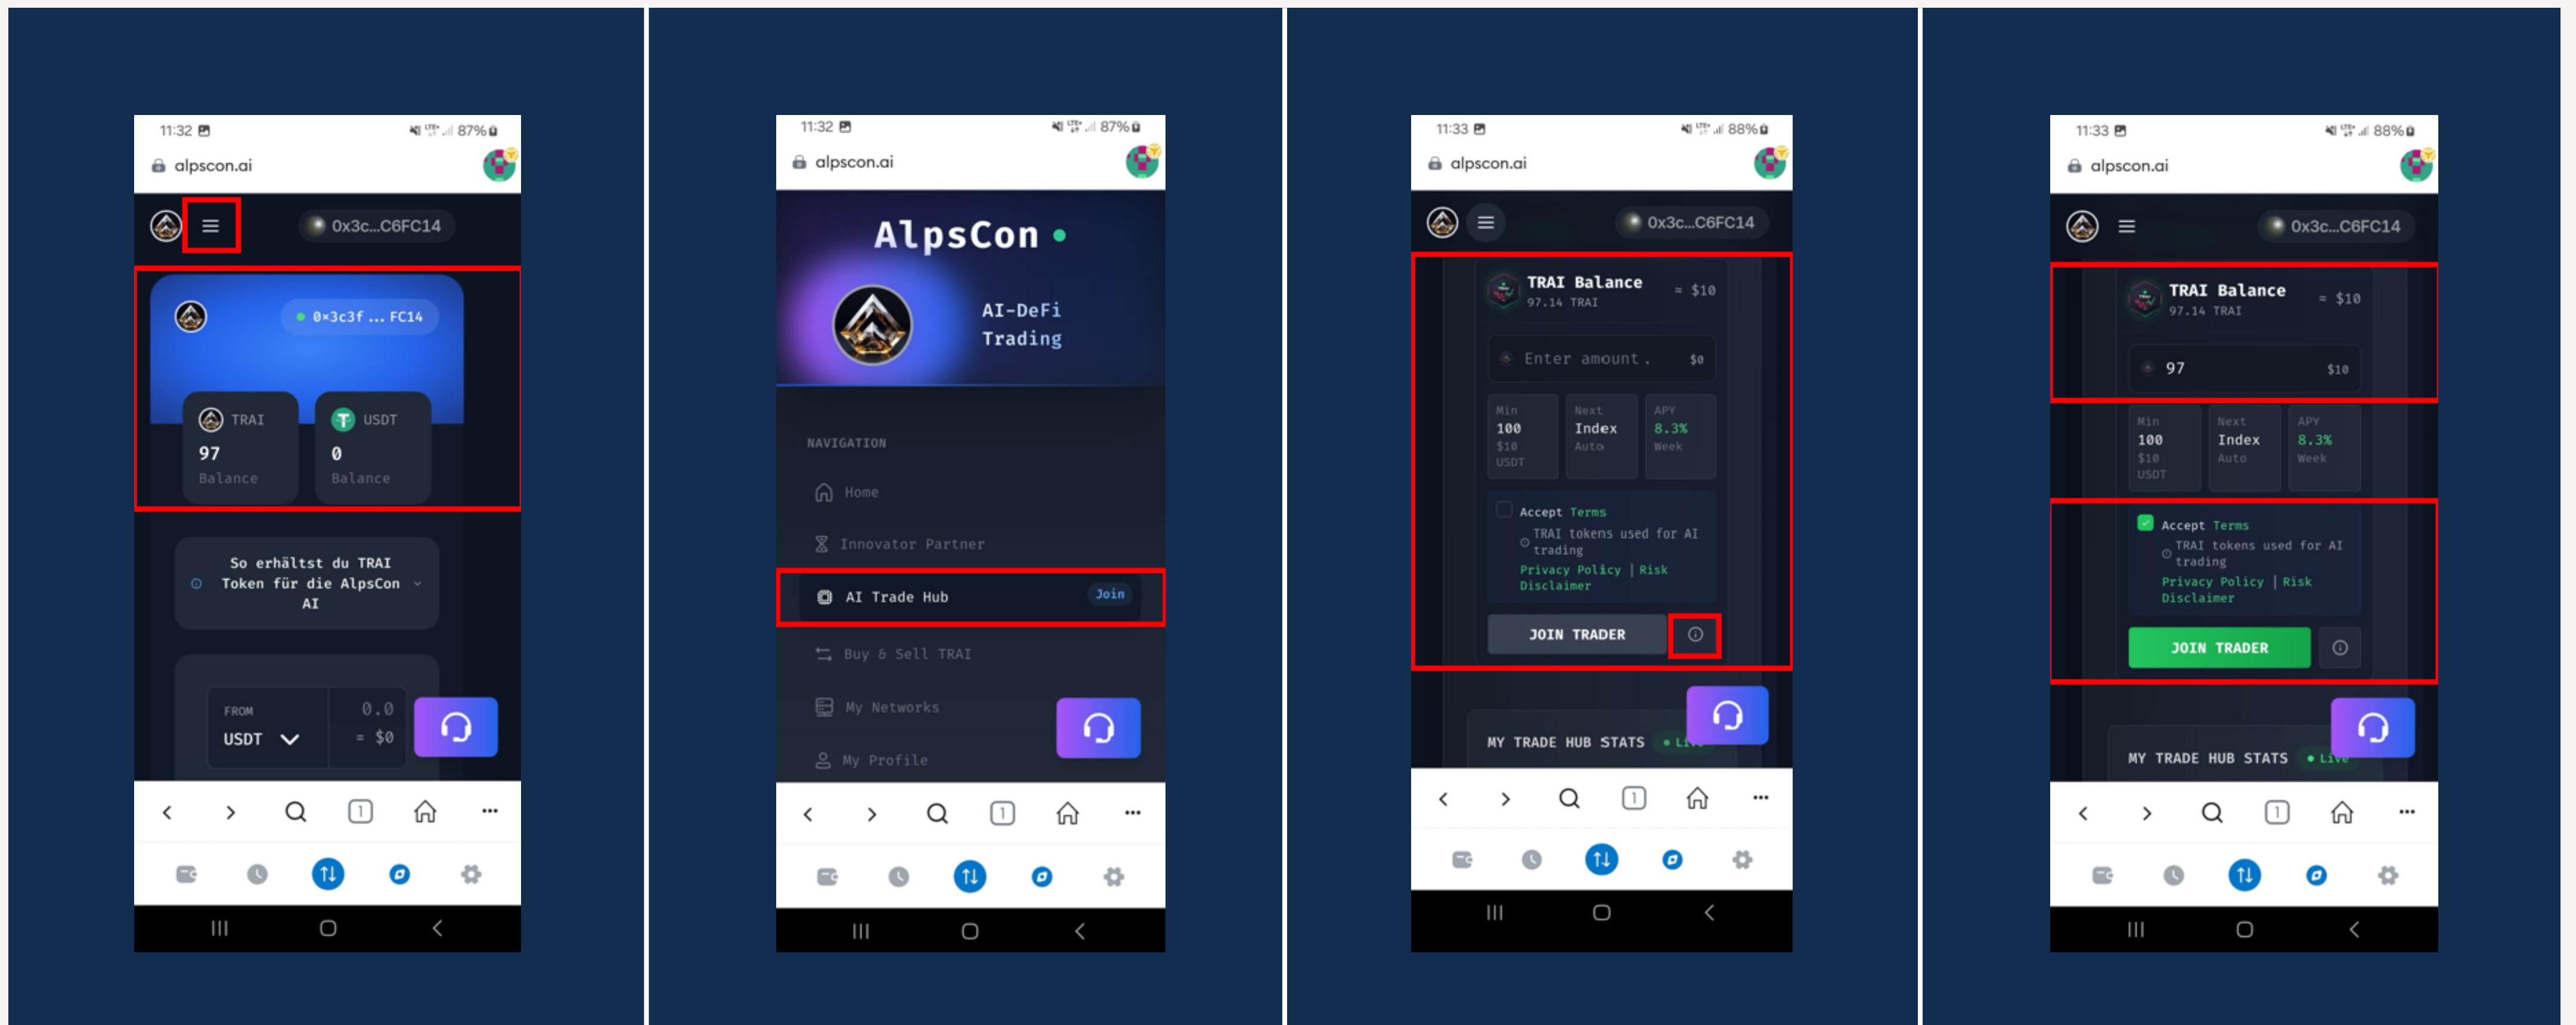

13. Swap TRAI tokens

1. Click on the **menu** (three lines) in the top left corner and go to to the **Buy & Sell TRAI** section.
2. Select the **desired cryptocurrency** that you want to exchange for our TRAI token.
3. Please note that **3% fees** will be deducted automatically during the swap.
4. After a successful swap, reload the page: Click on the three dots in the bottom right corner and select **reload**.

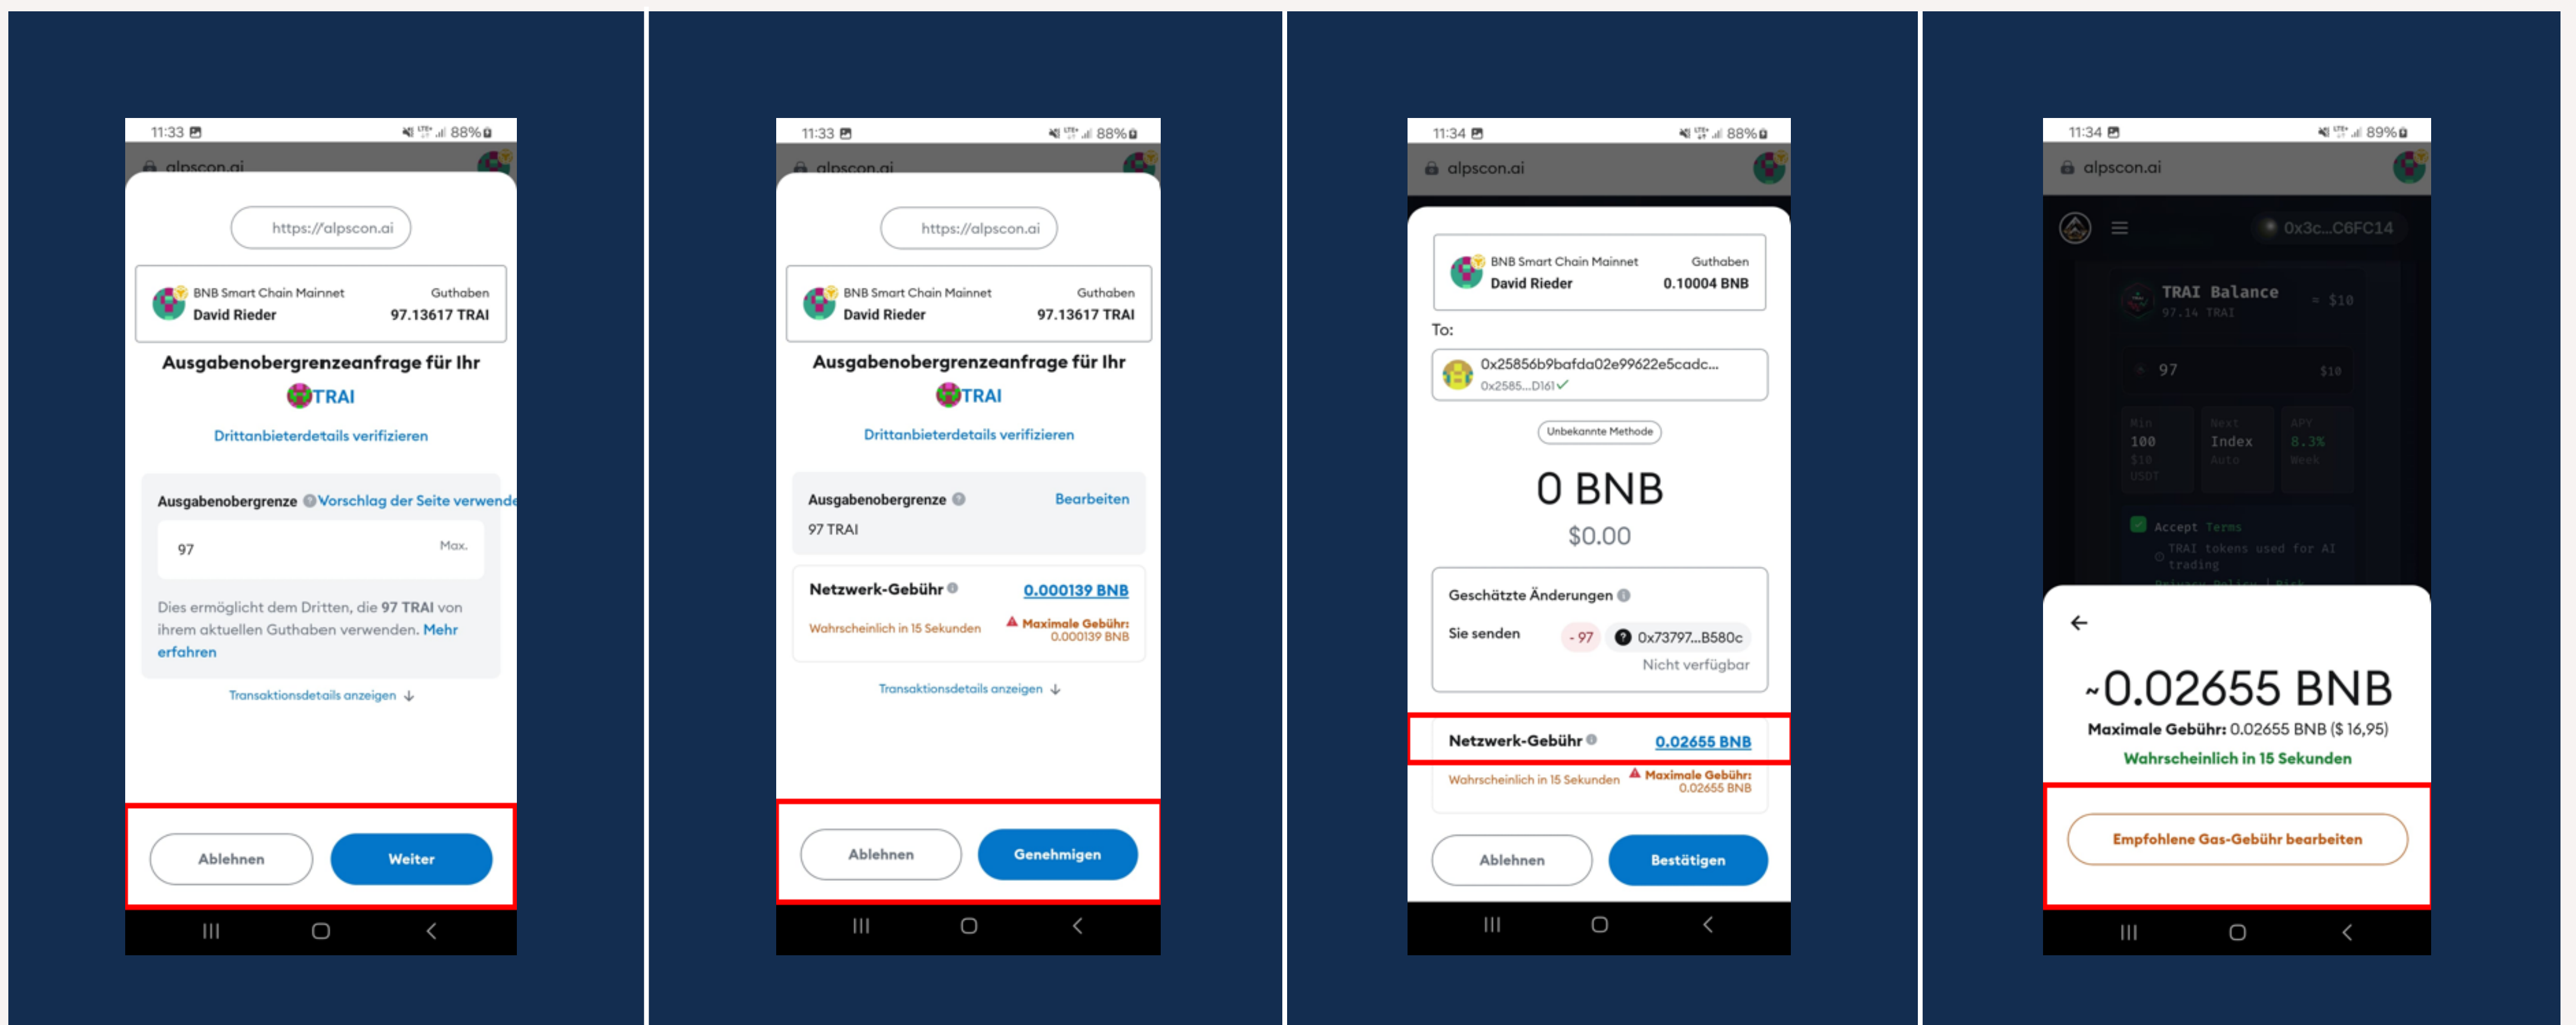

14. Activate trading AI

1. Your **TRAI balance** should now show the **desired value** minus the 3% swap fee.
2. Click on the **menu** (three lines) at the **top left** and switch to the **AI TradeHub area**.
3. The highlighted **i** contains important **information** about our **smart contract**.
4. Please also **read** our **privacy policy** and the **risk disclaimer** carefully.
5. **Confirm** this by placing a **check mark** in the corresponding box.
6. To **activate the AI**, enter the **desired value** and follow the remaining steps.

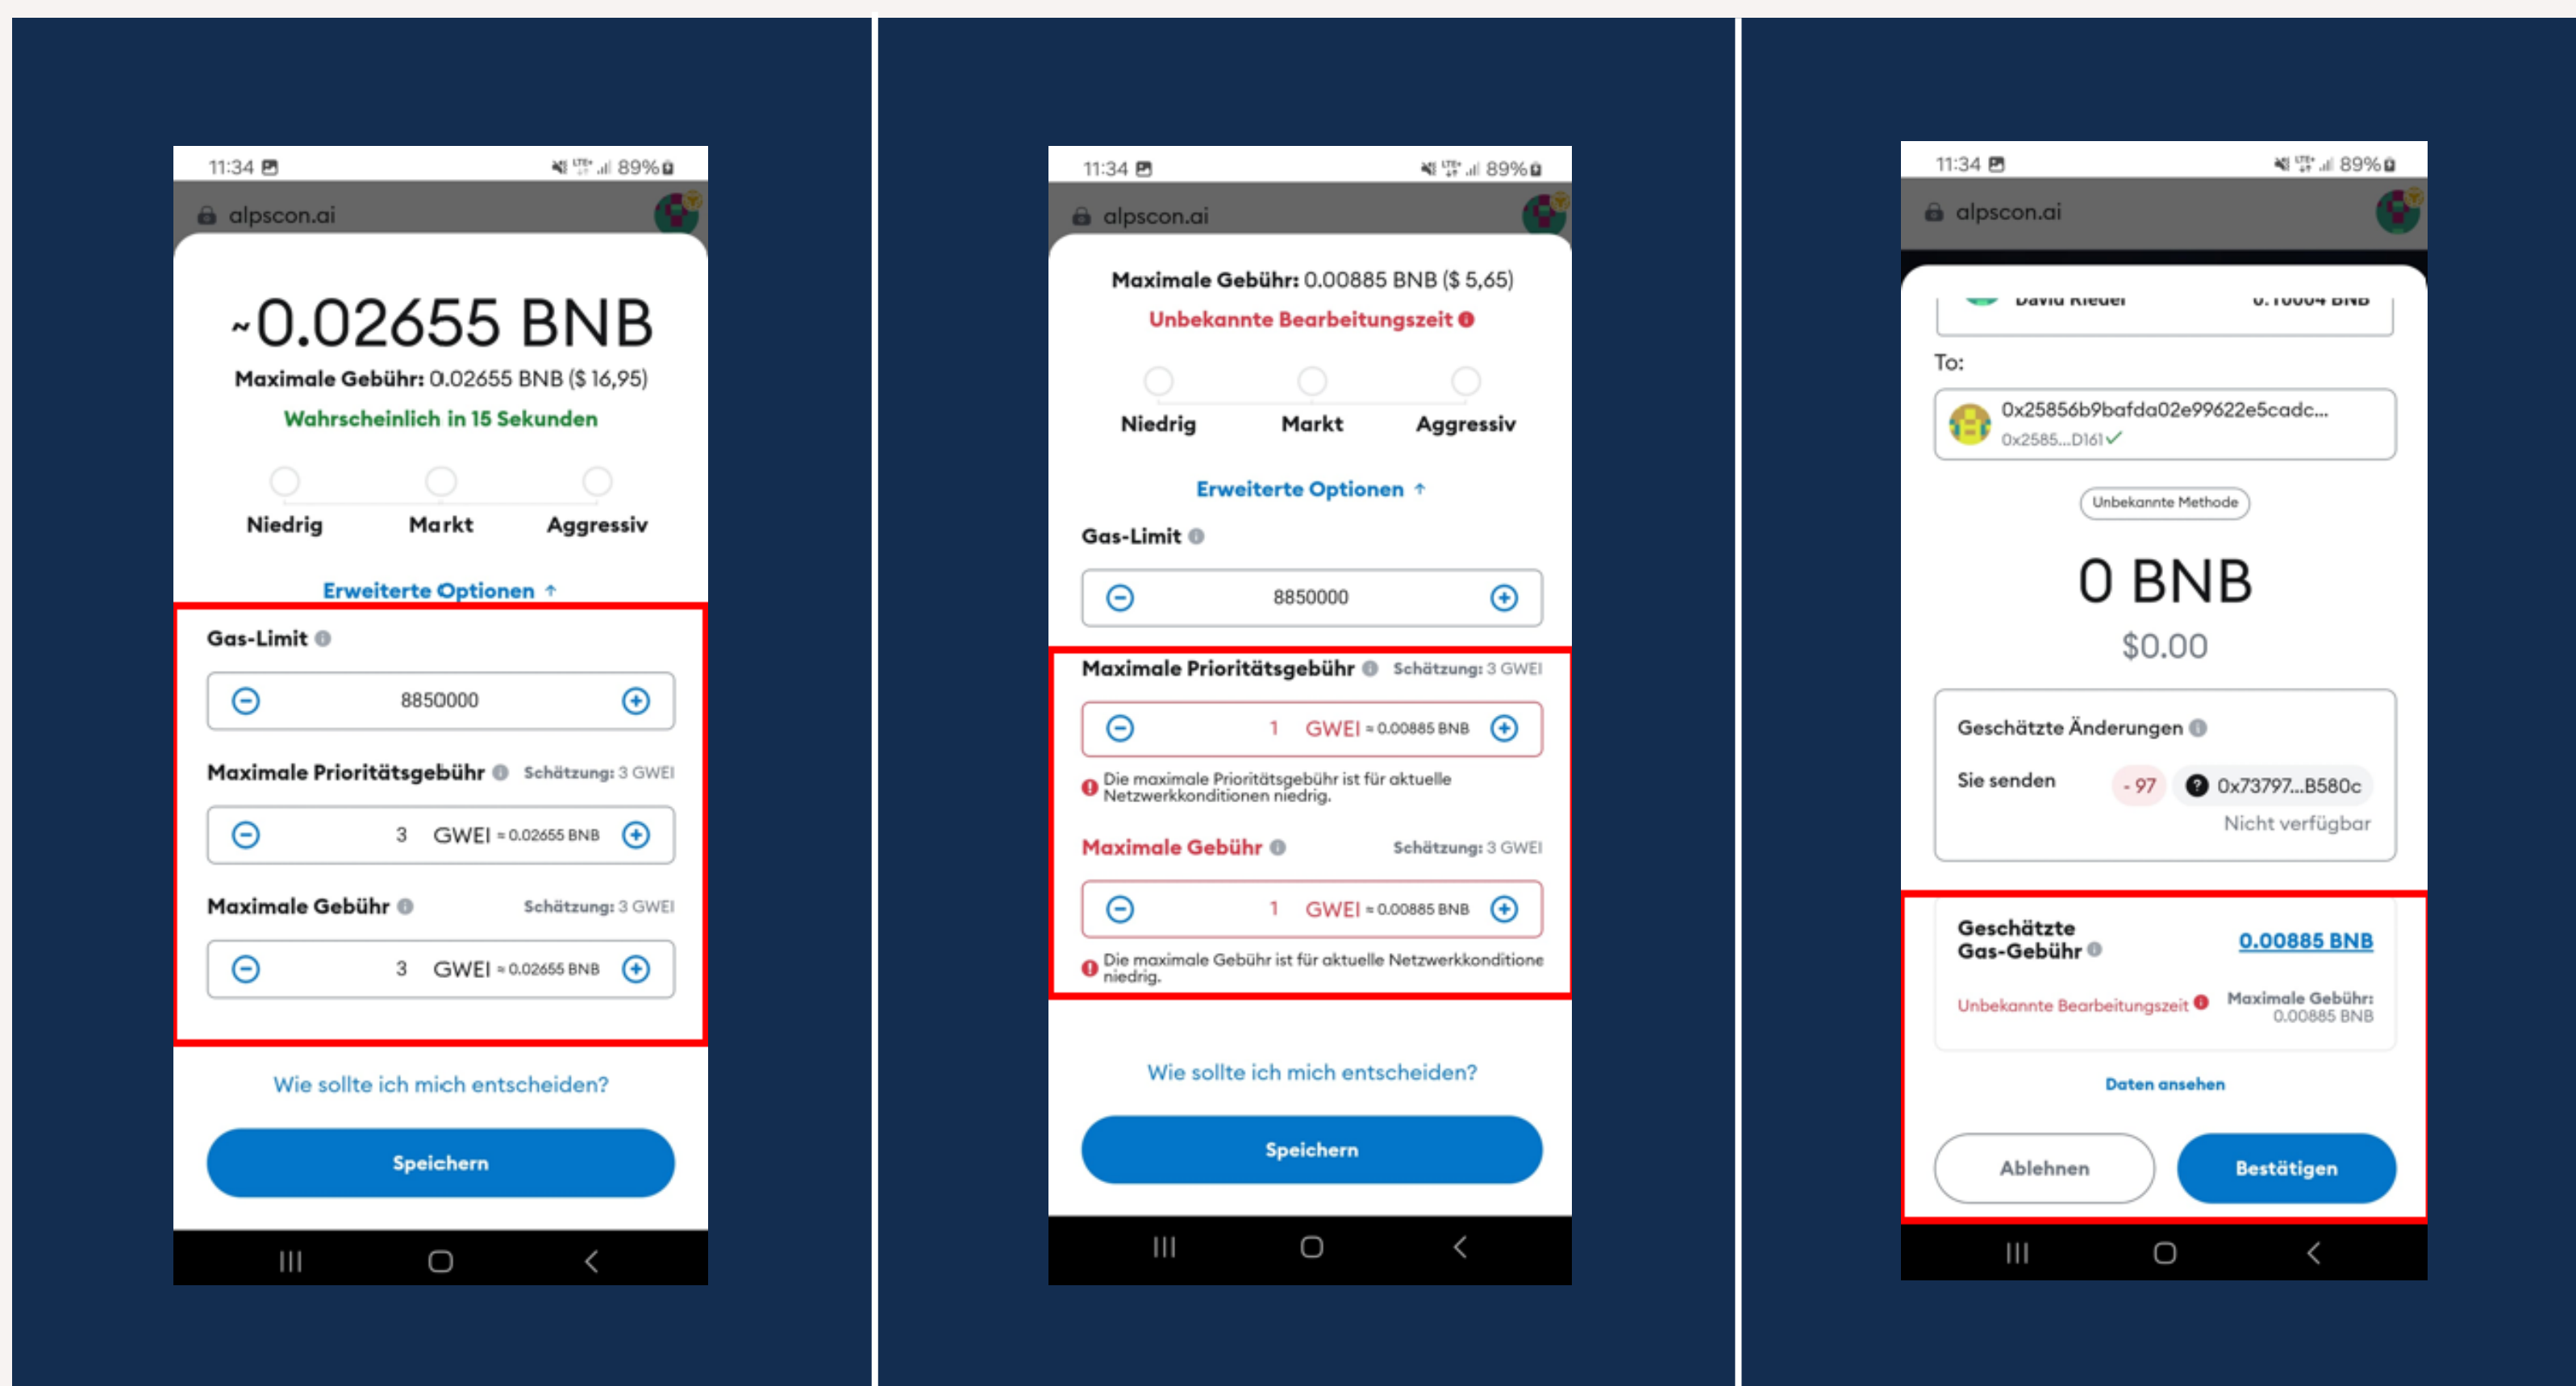

15. Adjust fees

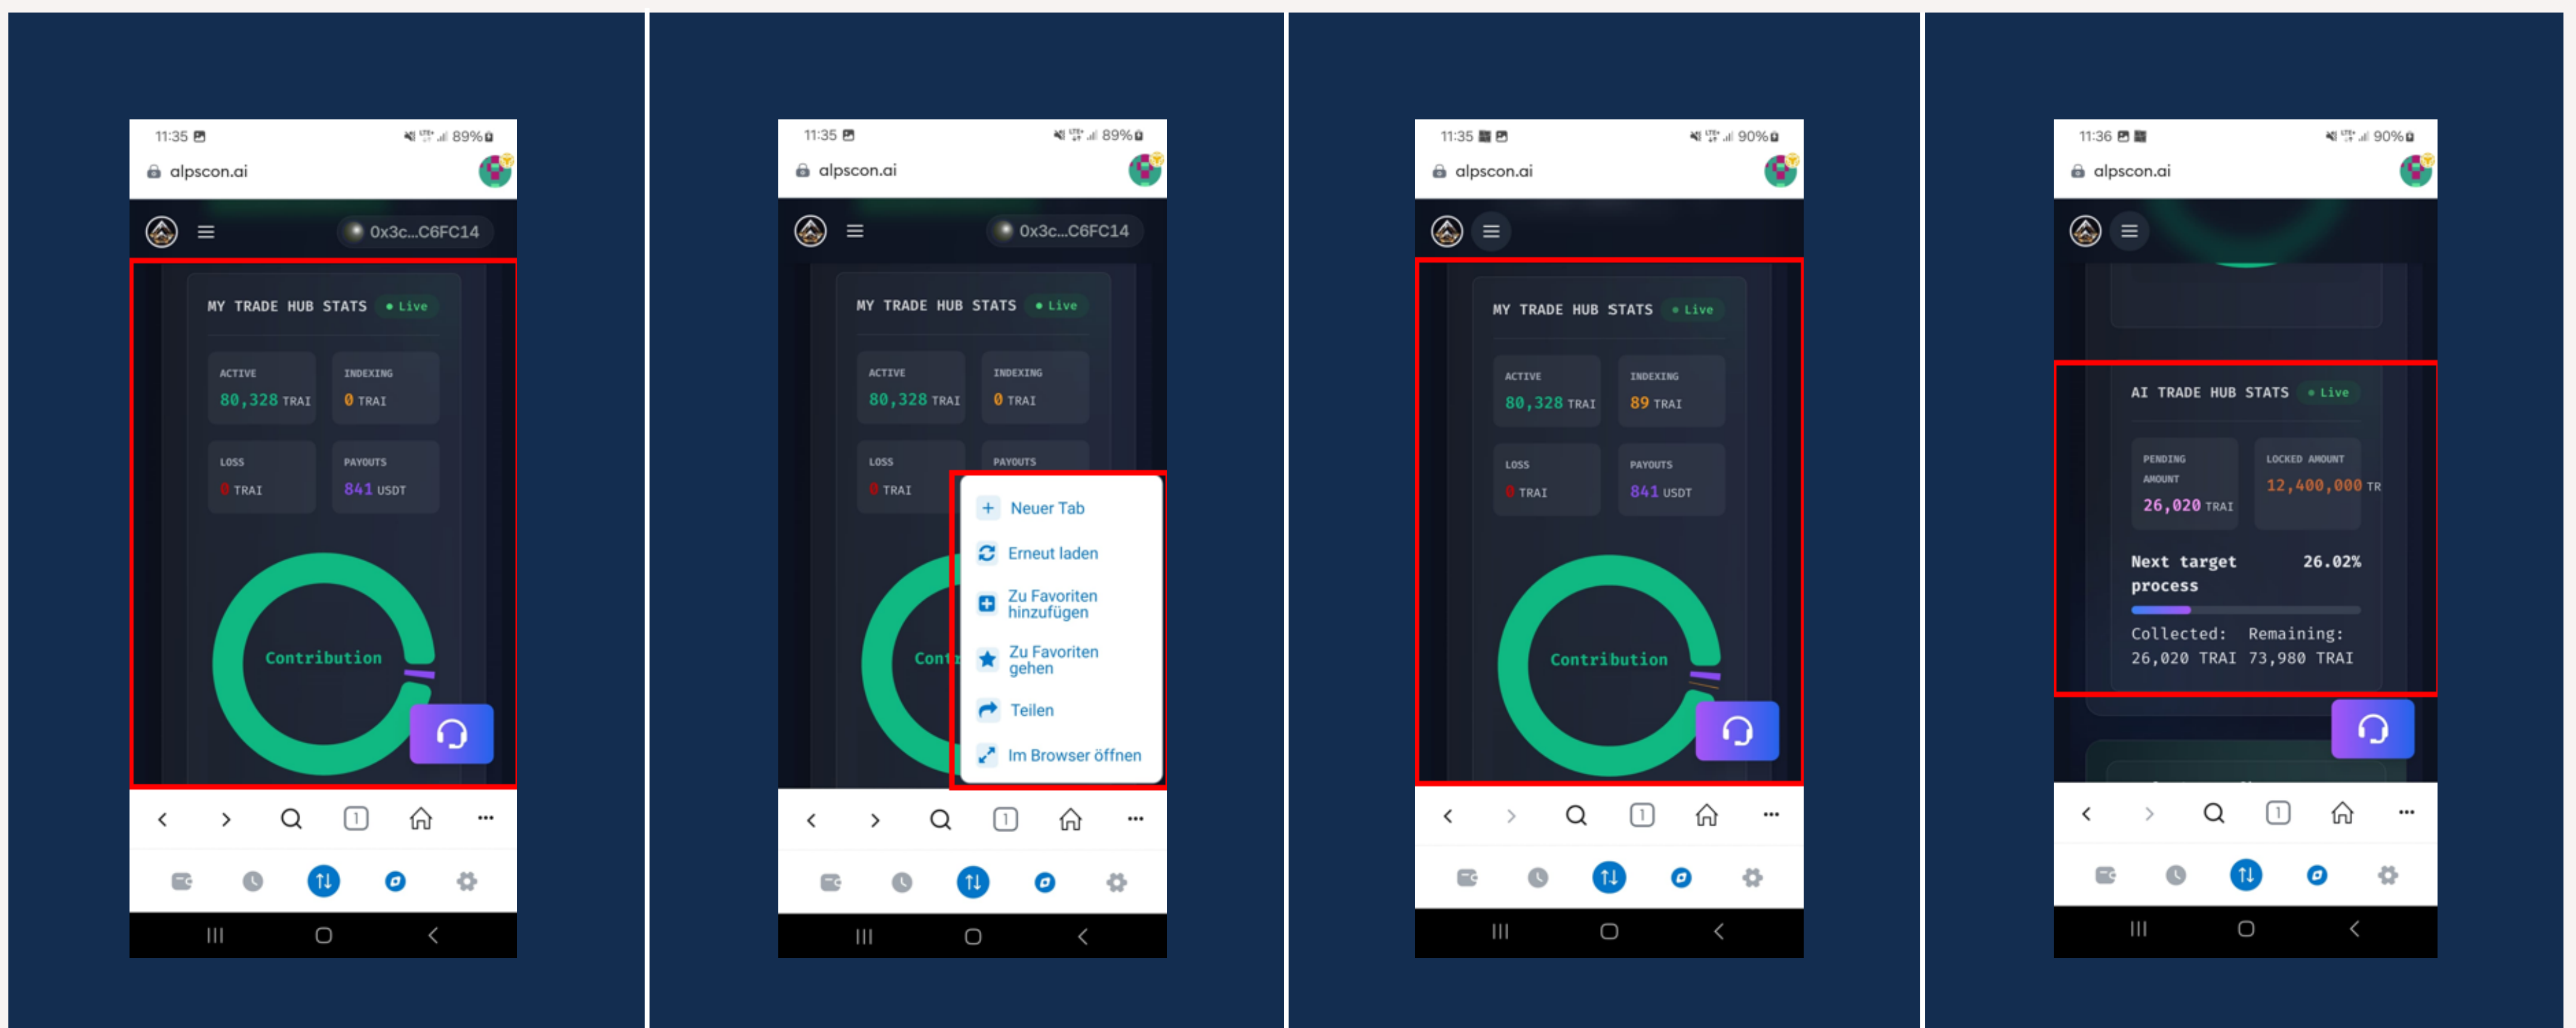

Follow the steps and adjust the gas fees as necessary according to the instructions before confirming. High gas fees on BSC are caused by network congestion, complex smart contracts, prioritization of expensive transactions, high costs for BEP-20 transfers, and bot activity (arbitrage & MEV).

Solution: Avoid peak times, adjust gas fees.

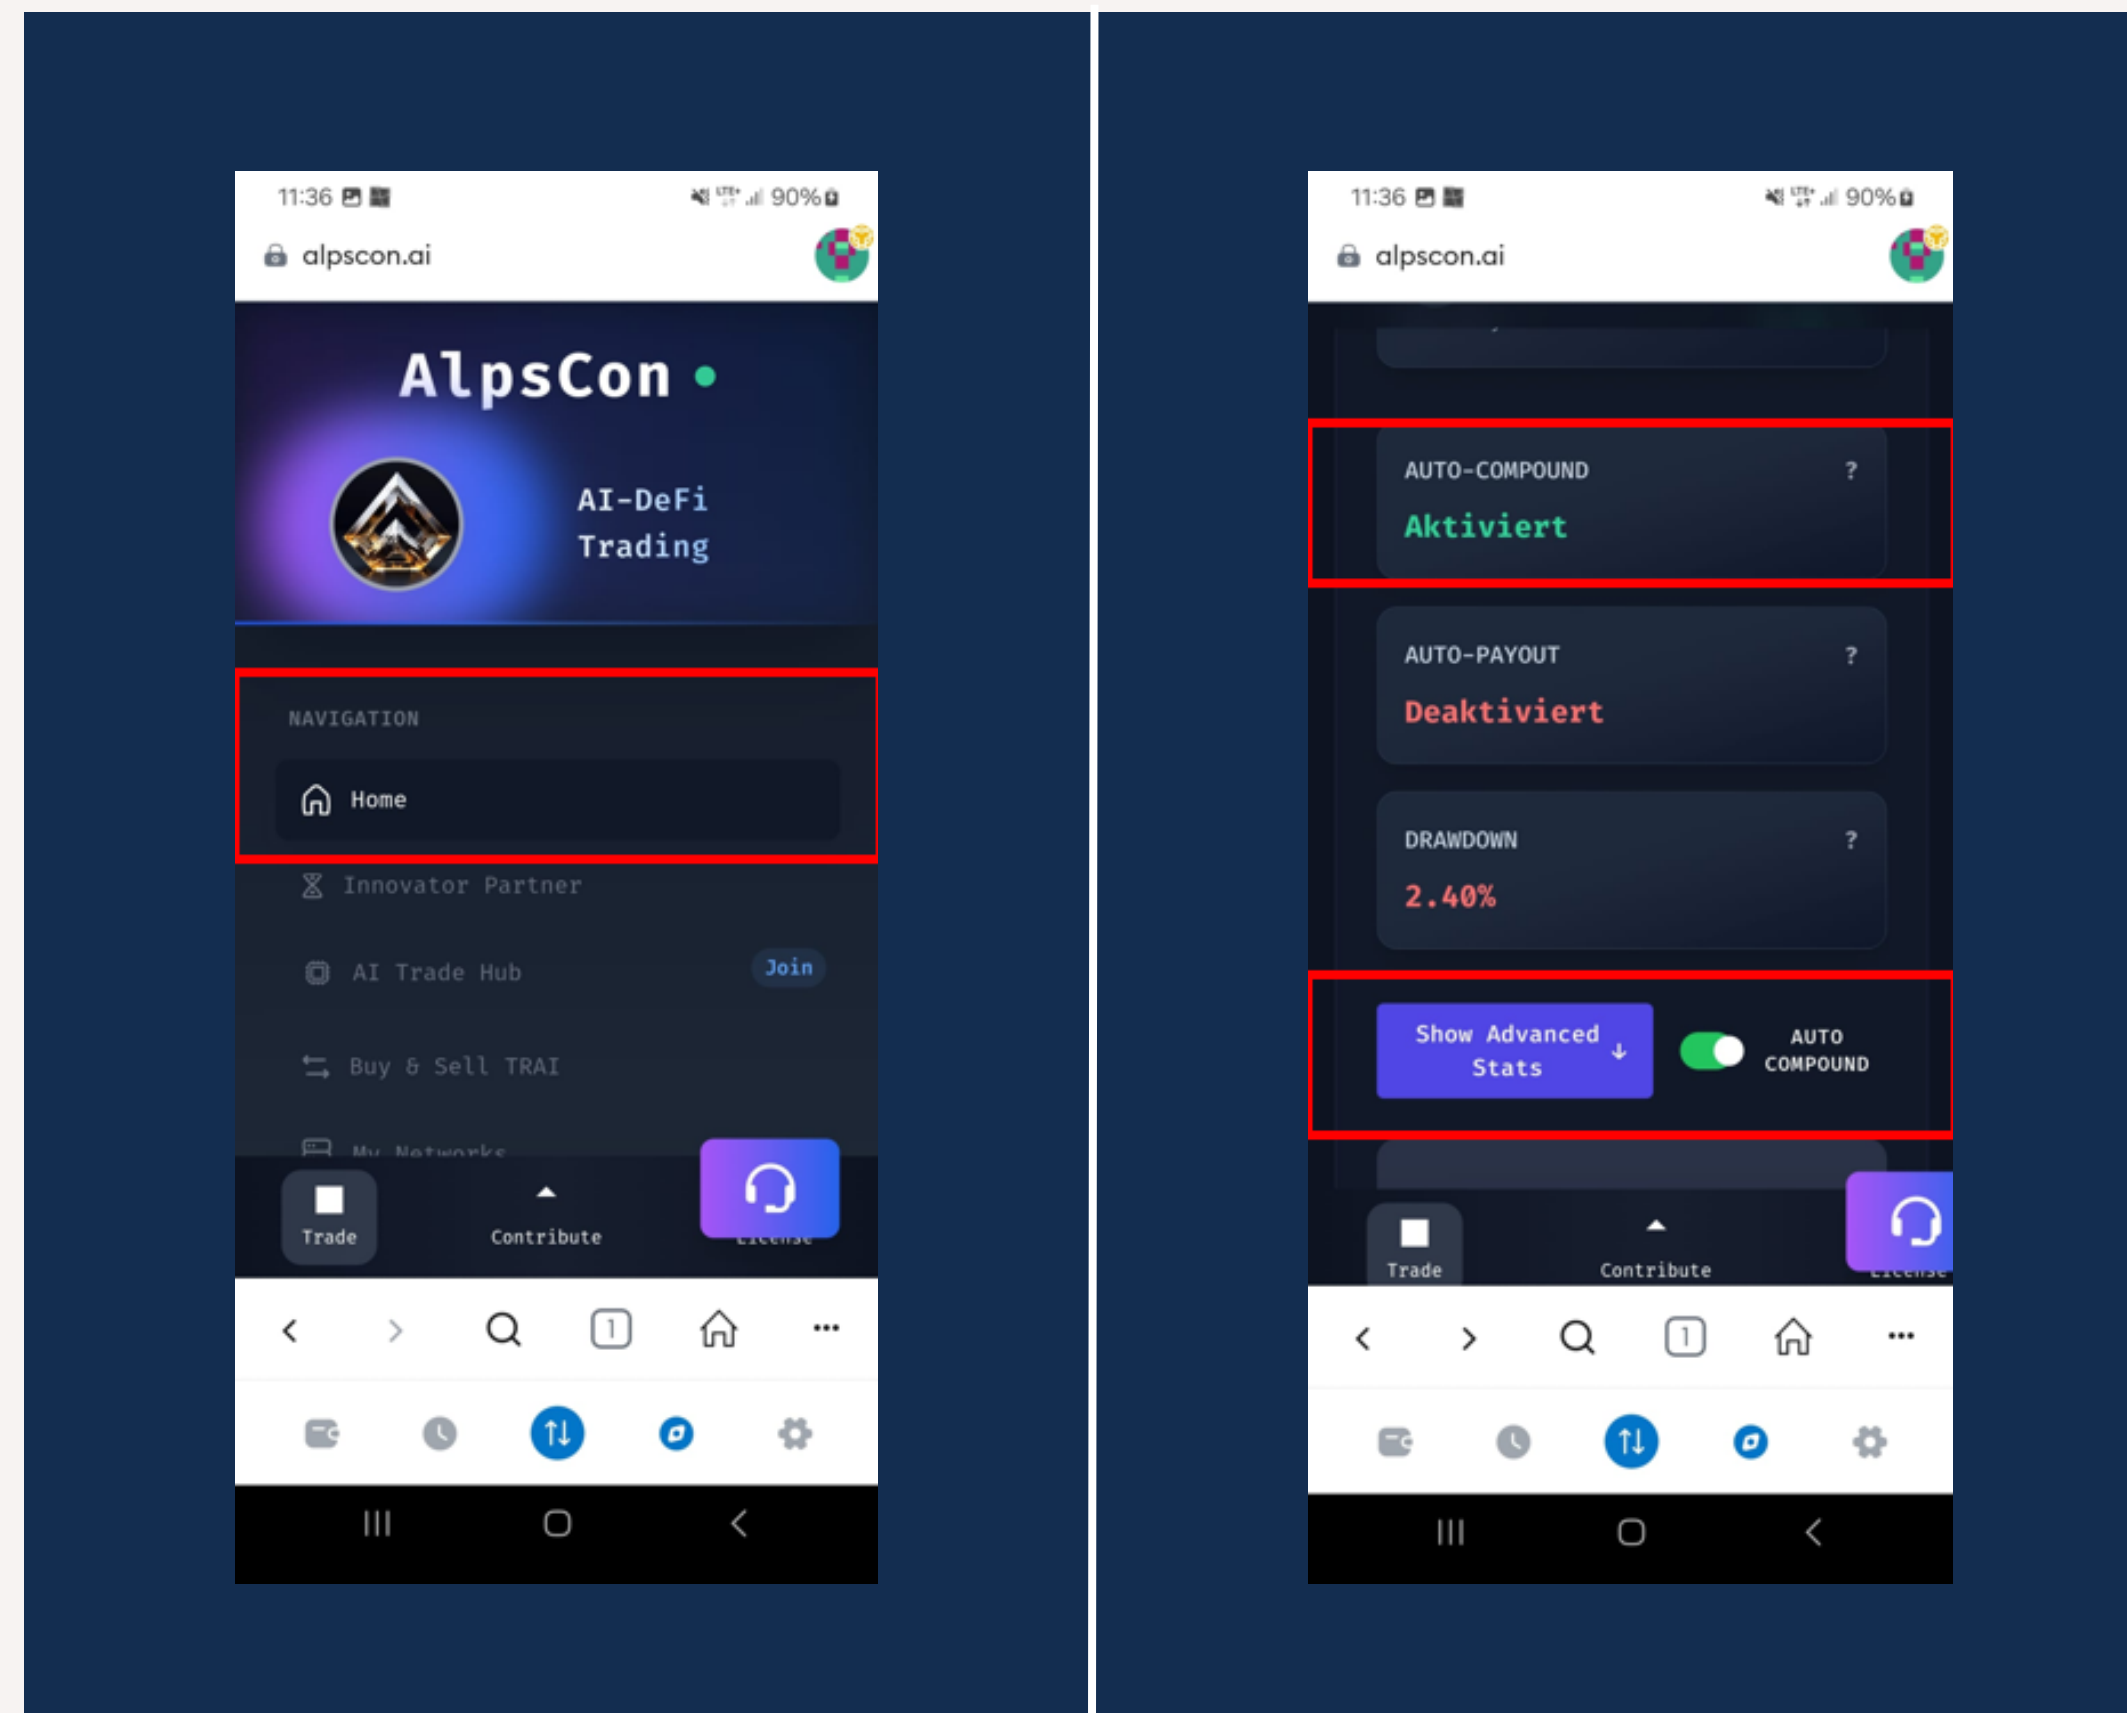

16. Confirm smart contract

Scroll down to My Trade Hub Stats, click on the three dots on the right at the bottom and reload the page. If everything has worked, you will find your value in Indexing (waiting for AI). The amount will change from Indexing to Active when the next 100,000 TRAI target has been reached.
(Existing customers have priority).

17. Activate auto compound

If you want to **enable auto-compounding**, switch to the **Home** section and scroll down until you find the **Auto Compound** slider. Click on it and **confirm** the process.

We congratulate you on your decision. May this step be the beginning of a promising future together!

Your Alpscon management team
